INVESTMENT OBJECTIVE AND STRATEGY

The Fund intends to achieve long term capital growth derived from a diversified portfolio of equity and fixed income securities. The Fund aims to provide absolute returns in excess of the return of the composite benchmark, 90% BPI Philippine Government Bond 1-3 Year Index and 10% Philippine Stock Exchange Total Return Index (PSEi TRI), net of tax.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The BPI Bayanihan Balanced Fund is suitable for investors who:

- Are at least classified as moderately aggressive based on their risk profile
- Have an investment horizon of more than five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Equity Price Risk: Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

BENCHMARK INFORMATION

Name: The PSEi Total Return Index (PSEi TRI)

Date of Change: January 2, 2025

Description and Reason for Change: The Philippine Stock Exchange Index or PSEi is the main index of the Philippine Stock Exchange. The PSEi is a free float-adjusted market capitalization-weighted index of the 30 largest and most active common stock. The PSEi Total Return Index (PSEi TRI) covers both price performance and income from dividend payments by reinvesting cash dividends back to the PSEi according to each constituent's respective market capitalization weightings. The change in the fund's benchmark from PSEi to PSEi TRI is mainly to satisfy the characteristics of a valid benchmark for a UITF in the BSP Circular No. 1178, and to conform with the Global Investment Performance Standards (GIPS) requirement for firms to select an appropriate total return benchmark when available.

Information about the benchmark may be accessed through Philippine Stock Exchange <https://www.pse.com.ph/>. Alternatively, participants may request information from BPI Wealth at bpiwealth.com.ph.

OUTLOOK AND STRATEGY

Market Review. In September, local government bond yields moved in mixed directions. Short-term yields (1 year and below) declined by an average of 28 basis points, reflecting the market's response to easing inflation and monetary policy. On the other hand, longer-term yields (1 to 25 years) saw a slight increase, averaging a 1.6 basis point rise. Despite these movements, returns remained positive, with the BPI Government Bond Index gaining 0.27% and the BPI Money Market Index up 0.44% for the month.

The Bureau of the Treasury (BTr) continued its regular weekly auctions of Fixed Rate Treasury Notes (FXTNs), offering various tenors from 3 to 20 years. Most of the bonds, specifically the 3-, 5-, 7-, and 10-year FXTNs, were fully awarded at competitive yields ranging from 5.605% to 5.939%. The 20-year FXTN was only partially awarded, with an average yield of 6.421%, indicating selective investor appetite for longer durations.

Meanwhile, local inflation rose to 1.5% in August, up from 0.9% in July, driven mainly by higher food prices, particularly rice and vegetables, as well as increased transport costs due to fuel price adjustments. Despite the uptick, inflation remained within the Bangko Sentral ng Pilipinas' (BSP) target range of 2-4%, suggesting that price pressures were still manageable. The central bank is forecasting inflation will average 1.7% this year, before rising to 3.3% in 2026 and 3.4% in 2027.

The Philippine Stock Exchange Index (PSEi) fell by 3.28% month-on-month in September, breaching the 6,000 level to close at 5,953.46. The index was dragged by negative market sentiment brought about by escalating domestic political risks. Overseas, the US Federal Reserve reduced interest rates by 25 basis points as widely expected in their September 17 meeting. FTSE Rebalancing also transpired where the Philippines saw net inflow of around US\$60 million. Back to the local front, RCR had a secondary share placement last September 22 priced Php7.75 or 5% discount from previous close.

The PSEi saw its activity slowed for the month with Average Daily Turnover at Php5.71 billion or 20% month-on-month. Meanwhile, foreigners still remained as net sellers at US\$72 million. Foreign Participation was recorded at 50%.

On a per stock basis, the top three index gainers for the month include: PLUS (+9.78%), LTG (+8.70%) and SCC (+6.99%). Meanwhile, the bottom three performers were: GTCAP (-16.59%), ALI (-13.04%) and URC (-12.47%).

Fund Performance. The fund returned 0.02% in September, below the benchmark by 9 basis points. Year-to-date, the Fund registered a gain of 3.51%, above the benchmark by 27 basis points.

Fund Strategy. The Fund looks to maintain its duration position as interest rates are expected to decline in the medium term. While inflation has settled within the BSP's target in the past months, upside risks are still present. The BSP has decreased its policy rates by 75 basis points to 5.75% in 2024. The central bank remains vigilant in monitoring inflation figures before easing rates further. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term. As for Equities, The Fund will be defensive as volatility from international trade (US Tariffs) and local political risks to persist. The preference is for companies with leading market capitalization, good fundamentals as well as high dividend paying stocks.
