⁴ BENCHMARK INFORMATION

Name: MSCI All Country World Index Net Total Return USD Index (Php)

Description and Key Characteristics: The MSCI ACWI Index, MSCI's flagship global equity index, is designed to represent performance for the full opportunity set of large and mid-cap stocks across 23 developed and 24 Emerging Markets. With 2,757 constituents, the index covers approximately 85% of the global investable equity opportunity set.

The index is based on the MSCI Global Investable Market Indexes (GIMI) Methodology — a comprehensive and consistent approach to index construction that allows for meaningful global views and cross regional comparisons across all market capitalization size, sector and style segments and combinations. This methodology aims to provide exhaustive coverage of the relevant investment opportunity set with a strong emphasis on index liquidity, investability and replicability.

The MSCI Total Return Indices measure the market performance, including price performance and income from regular cash distributions (cash dividend payments or capital repayments). MSCI's Daily Total Return (DTR) methodology reinvests regular cash distributions in indices on the ex-date of such distributions.

Relation to the Fund's Objective or Investment Strategy: The Fund operates as a Feeder Fund. The Target Fund is actively managed and will refer to MSCI All Country World Index (PHP) when constructing the portfolio and managing its risk to ensure that the Fund remains aligned with its investment objectives. When selecting investments, the Target Trustee has discretion and is not restricted to the components or weighting of the Index. The Target Fund may invest in securities not included in the Index to take advantage of investment opportunities, subject to the asset class, regional, industry, sector and/or strategy requirements of its investment objectives. Investors may use the Index to measure the performance of the Fund.

Information about the benchmark may be accessed through MSCI <https://www.msci.com/>. Alternatively, participants may request information from BPI Wealth at bpiwealth@bpi.com.ph.

OUTLOOK AND STRATEGY

Market Review. Global equities posted a solid month, with the MSCI All Country World (ACWI) Total Return Index (in USD) rising by 2.11% in October, driven by investor optimism around rate cuts, strong corporate earnings, and sustained AI enthusiasm. The U.S. Federal Reserve cut interest rates by 25 basis points to a target range of 3.75–4.00%, which gave risk assets a boost. This cut marked the second consecutive reduction, as the Fed responded to signs of slowing in the labor market and weaker economic momentum. The Fed also announced the end of its quantitative tightening from December where they will stop shrinking the balance sheet. European markets advanced moderately. Inflation in the eurozone eased to around 2.1% in October, down 2.2% in September. STOXX All Europe Index rose, helped by gains in autos and luxury goods amid signs of recovering Chinese demand. Japan's Nikkei 225 jumped 16%, its strongest month-on-month performance in decades. The rally was underpinned by the election of Sanae Takaichi as leader of the ruling party raising expectations of more expansionary fiscal and monetary policy. The MSCI ex-Japan Index rose 4.5% in October. Korea and Taiwan benefited from the trade talks with the U.S. Their semiconductor space saw rallies for the month with AI enthusiasm. Signs of easing trade tension between the U.S. and China further supported emerging Asian markets.

Fund Performance. The fund returned 3.52% in October, above the benchmark by 25 bps. On a year-to-date basis, the fund returned 17.88%, behind the benchmark by 370 basis points.

Fund Strategy. The fund manager will continue to invest in equities of medium to large capitalization companies while integrating Catholic social teachings into the investment process.
