4 BENCHMARK INFORMATION

Name: PSEi Total Return Index (PSEi TRI)

Description and Key Characteristics: The Philippine Stock Exchange Index or PSEi is the main index of the Philippine Stock Exchange. The PSEi is a free float-adjusted market capitalization-weighted index of the 30 largest and most active common stock.

The PSEi Total Return Index (PSEi TRI) covers both price performance and income from dividend payments by reinvesting cash dividends back to the PSEi according to each constituent's respective market capitalization weightings.

Relation to the Fund's Objective or Investment Strategy: Being an actively managed fund, the Trustee has discretion to select the Fund's investments and is not bound by the components of its benchmark. The Trustee therefore refers to the benchmark when constructing the Fund's portfolio and performs risk management measures to ensure that the deviation from the index remains within the Fund's policies and objectives. The PSEi TRI is constantly used by investors to gauge the performance of the Fund. Information about the benchmark may be accessed through Philippine Stock Exchange <https://www.pse.com.ph/>. Alternatively, participants may request information from BPI Wealth at bpiwealth@bpi.com.ph.

OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange (PSEi) ended the year on a positive note and managed to close above the psychological 6,000 level. Lower-than-expected domestic November inflation print and rate cuts from both the US Federal Reserve (The Fed) and the Bangko Sentral ng Pilipinas' provided the lift. Meanwhile, ongoing worries over the country's slowing economic growth, peso weakness and foreign selling capped the upside. The PSEi closed 2025 at 6,052.92 or +0.51% on a month-on-month basis. Trading activity slowed in December, with Average Daily Turnover at Php5.73 billion or 7.7% lower than in prior month's Php6.22 billion. Foreigners were net sellers with a hefty US\$202 million and were more active at 54% participation. On a per stock basis, the top three index gainers for the month include: AGI (+16.50%), ALI (+10.32%) and CBC (+9.83%). Meanwhile, the bottom three performers were: PLUS (-33.88%), PGOLD (-9.52%) and SM (-5.47%).

Fund Performance. The fund returned 1.15% below its benchmark by 32 basis points. Year-to-date, the fund registered a loss of 0.69%, above the benchmark by 345 basis points.

Fund Strategy. The Fund will remain defensive given heightening geopolitical tensions, peso depreciation and evolving local political risks. The Fund's preference is for companies with leading market capitalization, clear earnings growth drivers, dividend-paying and high-yielding.
