Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. In September, local government bond yields moved in mixed directions. Short-term yields (1 year and below) declined by an average of 28 basis points, reflecting the market's response to easing inflation and monetary policy. On the other hand, longer-term yields (1 to 25 years) saw a slight increase, averaging a 1.6 basis point rise. Despite these movements, returns remained positive, with the BPI Government Bond Index gaining 0.27% and the BPI Money Market Index up 0.44% for the month.

The Bureau of the Treasury (BTr) continued its regular weekly auctions of Fixed Rate Treasury Notes (FXTNs), offering various tenors from 3 to 20 years. Most of the bonds, specifically the 3-, 5-, 7-, and 10-year FXTNs, were fully awarded at competitive yields ranging from 5.605% to 5.939%. The 20-year FXTN was only partially awarded, with an average yield of 6.421%, indicating selective investor appetite for longer durations.

Meanwhile, local inflation rose to 1.5% in August, up from 0.9% in July, driven mainly by higher food prices, particularly rice and vegetables, as well as increased transport costs due to fuel price adjustments. Despite the uptick, inflation remained within the Bangko Sentral ng Pilipinas' (BSP) target range of 2–4%, suggesting that price pressures were still manageable. The central bank is forecasting inflation will average 1.7% this year, before rising to 3.3% in 2026 and 3.4% in 2027.

Fund Performance. The Fund returned 0.34% during the month, outperforming the benchmark by a basis point.

Fund Strategy. The Fund favors the safety of shorter-dated securities and time deposits. With the expectation of rate cuts this year due to favorable macro economic conditions, the fund manager aims to lock in yields by extending duration of the fund.
