BENCHMARK INFORMATION

Name: The PSEi Total Return Index (PSEi TRI)

Date of Change: January 2, 2025

Description and Reason for Change: The Philippine Stock Exchange Index or PSEi is the main index of the Philippine Stock Exchange. The PSEi is a free float-adjusted market capitalization-weighted index of the 30 largest and most active common stock. The PSEi Total Return Index (PSEi TRI) covers both price performance and income from dividend payments by reinvesting cash dividends back to the PSEi according to each constituent's respective market capitalization weightings. The change in the fund's benchmark from PSEi to PSEi TRI is mainly to satisfy the characteristics of a valid benchmark for a UITF in the BSP Circular No. 1178, and to conform with the Global Investment Performance Standards (GIPS) requirement for firms to select an appropriate total return benchmark when available.

Relation to the Fund's Objective or Investment Strategy: Being a passively managed fund, the Trustee has limited discretion to select the fund's investments. The Trustee therefore refers to the benchmark when constructing the Fund's portfolio and performs risk management measures to ensure that Fund closely tracks the Index to the extent practicable. The PSEi TRI is used by investors to gauge the performance of the Fund.

Information about the benchmark may be accessed through Philippine Stock Exchange <https://www.pse.com.ph/>. Alternatively, participants may request information from BPI Wealth at bpiwealth.com.ph.

OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) slid for the second straight month on persistent foreign selling. Investors digested quite an eventful month with key macro-economic events happening on both local and foreign fronts, along with two major rebalancing days. On the local space, the market took cues from regulatory news on e-gaming and telecommunication, a deceleration in July Inflation, underwhelming second quarter corporate earnings and a third consecutive rate cut by the Bangko Sentral ng Pilipinas (BSP). Meanwhile in the US, market sentiment was driven by the lower-than-expected US Non-farm payrolls early in the month, and the US Federal Reserve's commentary which signaled a higher chance of a rate cut in September. Furthermore, two major rebalancing events spurred activity in the equities market namely the Philippine Stock Exchange Index Semi Annual Review and MSCI Quarterly Review. For the PSEi rebalancing, PLUS, despite being hounded by regulatory issues, was added to the main index, replacing BLOOM. Meanwhile for the MSCI rebalancing, RCR and PNB got added in the small cap index while DNL got deleted. The local bourse closed at 6,155.57 or 1.55% lower month-on-month.

The PSEi saw an increased level of activity with Average Daily Turnover registering at Php7.2billion in August, 9.67% month-on-month. Meanwhile, foreigners continued to be risk-averse with outflows accelerating to US\$74 million, the fifth straight month of net foreign selling. Foreign participation recorded at 46%.

On a per stock basis, the top three index gainers for the month include: GTCAP (+15.10%), JGS (+13.33%) and ALI (+12.00%). Meanwhile, the bottom three performers were: CNVRG (-21.70%), SMC (-15.16%) and TEL (-12.00%).

Fund Performance. The fund underperformed its benchmark by 80 basis points in August with a return of -2.11%.

Fund Strategy. The Fund will be opportunistic on market dips as volatility from the global front remains given sporadic situation over in the Middle East. The preference is for companies with leading market capitalization, good fundamentals and high dividend paying stocks.
