INVESTMENT OBJECTIVE AND STRATEGY

The Fund intends to achieve for its participants capital appreciation and income derived from a diversified portfolio of primarily long-term fixed income securities issued by the Republic of the Philippines. The Fund aims to provide returns in excess of the return of the BPI Philippine Government Bond Index.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust / Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The BPI PERA Government Bond Fund is suitable only for investors who:

- Are classified as moderate based on their risk profile
- Have an investment horizon of at least five (5) years.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors / events and/or negative developments in domestic political and economic conditions.

Liquidity Risk: Possibility to experience losses due to the fund's inability to convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.

Related Party Risk: Risk of any actual or potential conflicts of interest in handling of related party transactions.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

OUTLOOK AND STRATEGY

Market Review. The Philippine fixed income market experienced a relatively stable month in March 2025, with modest movements in yields and continued investor interest in government securities. The BPI Philippine Government Bond Index returned 0.44% for the month as rates crept higher by 0.7 bps on average, mostly on the very short end of the curve. Both domestic and international factors, including central bank policies, inflation trends, and geopolitical developments affected yield movements for the period.

The Bangko Sentral ng Pilipinas (BSP) kept its key policy rate at 5.75%, citing the need to balance inflation control with economic growth. Inflation for the month of February remained within the target range at 2.1.% year-on-year, although there were concerns about potential upward pressures from global commodity prices.

Demand for government securities remained strong, particularly for short to medium-term bonds. The Bureau of the Treasury successfully auctioned off several tranches of Treasury bills and bonds, with yields awarded slightly lower than the previous month. Demand was quite healthy with oversubscriptions seen across all tenors, particularly the 5- and 7-year papers. Overall market sentiment was positive, supported by stable macroeconomic indicators and a favorable investment climate. Nonetheless, investors remained cautious amid the potential impact of US President Trump's tariffs on growth and inflation.

Fund Performance. The Fund returned 0.00% during the month of March, underperforming its benchmark by 44 basis points.

Fund Strategy. The Fund looks to maintain its duration position as interest rates are expected to decline in the medium term. While inflation has settled within the BSP's target in the past months, upside risks are still present. The BSP has already decreased its policy rates by 75 basis points year-to-date to 5.75%. The central bank remains vigilant in monitoring inflation figures before easing rates further. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

LIST OF PROSPECTIVE INVESTMENTS

The following are among the Fund's approved investment outlets, wherein the Trustee intends to invest depending on strategy, availability, or other market-driven circumstances:
