### <sup>4</sup>BENCHMARK INFORMATION

**Name:** 91-day Treasury Bill, net of tax

**Description and Key Characteristics:** Treasury Bills are zero coupon peso-denominated short-term fixed income securities issued by the Republic of the Philippines through its Bureau of Treasury.

**Relation to the Fund's Objective or Investment Strategy:** The Fund is actively managed, allowing the Trustee full discretion on security selection. Given the Fund's primary objective of capital preservation for investors with a short-term horizon, the 91-day Treasury Bill, a liquid security that is representative of attainable short-term placements, is an appropriate benchmark. Investors may use the benchmark to gauge the Fund's performance.

Information about the benchmark may be accessed through Philippine Depository & Trust Corp. <https://www.pds.com.ph/>. Alternatively, participants may request information from BPI Wealth at [bpiwealth@bpi.com.ph](mailto:bpiwealth@bpi.com.ph).

## OUTLOOK AND STRATEGY

**Market Review.** In December, local bond yields posted a month-on-month increase of 10.26 basis points across the curve. Short-term yields of one year and below bucked the trend, declining by an average of 3.22 basis points. The rise in yields was most pronounced in the intermediate segment as investors took profits toward year-end. Five- and seven-year tenors saw the largest increases at 22.91 basis points and 20.51 basis points, respectively, followed by the three-year tenor, which rose by 19.09 basis points. Meanwhile, long-end yields eased by around 4 basis points amid growing concerns over economic growth prospects.

The BPI Money Market Index gained 0.32%, while the BPI 1–5 Year Index edged down by 0.01% and the BPI GS Overall Index declined by 0.16%.

On the macro front, November inflation settled at 1.5%, remaining below the government's 2% to 4% target range and easing from October's 1.7% print. The BSP maintained a dovish stance, reinforcing market expectations for further policy easing after cutting the monetary policy rate in December, with the possibility of additional cuts in 2026. Following the latest rate cut, the policy rate stands at 4.5%, with markets pricing in a potential move toward 4.0% in 2026.

**Fund Performance.** The Fund returned 0.70% during the month of December, outperforming the benchmark by 30 basis points.

**Fund Strategy.** The Fund favors the safety of shorter-dated securities and time deposits. Expectations of interest rates staying elevated may help maintain current portfolio yield.
