OUTLOOK AND STRATEGY

Market Review. Global fixed income assets gave positive returns in September, with the Bloomberg Barclays Global Aggregate Total Return Index up by 2.53% for the period as investors had mixed reactions to US central bank's policy moves. In the US, Treasury yields reversed August's decline, with all major maturities rising despite a 25-basis point rate cut by the Federal Reserve. The 2-year yield ended at 3.61%, the 10-year yield at 4.15%, and the 30-year yield climbed to 4.73%. This uptick followed stronger-than-expected jobless claims data and Fed Chair Powell's cautious tone, emphasizing "risk management" rather than a full pivot toward easing.

Globally, long-term government bond yields showed mixed movements. The 10-year German Bund held steady at 2.71%, while the UK 10-year Gilt yield dipped slightly to 4.15%, reflecting stable inflation and a hold on interest rates by the Bank of England. Investor sentiment remained cautious due to fiscal concerns and inflationary pressures across Europe.

In the Philippines, dollar-denominated bond yields declined, especially in longer tenors, contributing to a monthly return of 1.44% for the JP Morgan Asia Credit Index – Philippines. This was driven by price appreciation and stable interest income, as the Bangko Sentral ng Pilipinas maintained a dovish stance with a policy rate cut to 5.00%. The local bond market benefited from easing inflation and improving investor confidence.

Fund Performance. The fund returned 1.31% in September, underperforming the benchmark by 13 basis points.

Fund Strategy. The Fund will continue to closely track the JPMorgan Asia Credit Total Return Index. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
