⁵ BENCHMARK INFORMATION

Name: PSEi Total Return Index (PSEi TRI)

Description and Key Characteristics: The Philippine Stock Exchange Index or PSEi is the main index of the Philippine Stock Exchange. The PSEi is a free float-adjusted market capitalization-weighted index of the 30 largest and most active common stock.

The PSEi Total Return Index (PSEi TRI) covers both price performance and income from dividend payments by reinvesting cash dividends back to the PSEi according to each constituent's respective market capitalization weightings.

Relation to the Fund's Objective or Investment Strategy: Being a passively managed fund, the Trustee has limited discretion to select the fund's investments. The Trustee therefore refers to the benchmark when constructing the Fund's portfolio and performs risk management measures to ensure that Fund closely tracks the Index to the extent practicable. The PSEi TRI is used by investors to gauge the performance of the Fund.

Information about the benchmark may be accessed through Philippine Stock Exchange <https://www.pse.com.ph/>. Alternatively, participants may request information from BPI Wealth at bpiwealth@bpi.com.ph.

OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) had a choppy month in November before ultimately settling higher. The local bourse almost fell to a cliff, reaching sub-5,600, following a slew of weak domestic economic data such as dismal 3Q GDP, uninspiring 3Q corporate earnings coupled with heightened political issues. Concerns over Federal Reserve Policy Rates due to prolonged US Government Shutdown likewise dragged investor sentiment. However, the market was lifted by local bargain-hunting towards the latter part of the month. The PSEi rose by 1.56% month-on-month to close at 6,022.24. Trading activity surged in November with Average Daily Turnover registering at Php6.22 billion from Php5.00 billion following some key corporate action events such as the Maynilad (MYNLD) IPO and AREIT Secondary Share Placement. On foreign activity, foreigners turned “Net Buyers” at US\$78 million. On a per stock basis, the top three index gainers for the month include: CNVRG (+22.26%), SMC (+21.77%) and PLUS (+16.95%). Meanwhile, the bottom three performers were: URC (-13.70%), JFC (-12.74%) and SCC (-11.95%).

Fund Performance. The Fund registered a 1.65% return for the month, below the benchmark by 14 basis points. Year-to-date, the Fund registered a loss of 5.99%, below its benchmark by 106 basis points.

Fund Strategy. The Fund will continue to track the Philippine Stock Exchange Total Return Index (PSEi TRI).
