OUTLOOK AND STRATEGY

Market Review. The bond market was relatively flat end-July as participants stayed sidelined ahead of final details on the new RTB tranche, with the 10-year benchmark going down only about 2 bps on the month. Headline inflation printed benignly in July at roughly 0.9% year-on-year. At the same time, growth remains positive, with Q2 2025 GDP expanding around 5.5% year-on-year. Overall, the macro backdrop tilted toward lower rates, reflecting low inflation, still-solid growth, and subdued volatility. Liquidity conditions stayed orderly, with limited knee-jerk moves across the curve. This combination left yields narrowly traded and anchored just below recent levels.

The Bureau of the Treasury announced RTB 519 with an initial offer size of PHP 200bn, pricing scheduled for 5 August, a public offer window through 15 August, and settlement on 20 August. Market expectations are that the accepted size will exceed the initial PHP 200bn, driven largely by the sizable R-513 maturity in August of around PHP 500bn, which will create strong rollover demand from institutional holders.

Looking ahead, the bias remains toward lower yields as benign inflation, slower growth and fading trade policy-related volatility. The combination of slower but still positive growth and the prospect of very strong demand for RTB 519 suggests continued compression, particularly in the belly of the curve. Key risks that could derail this path include a sudden global risk-off episode, materially higher imported inflation, or a surprise change in BSP guidance. For now, however, the prevailing view is that subdued inflation, ample demand for government supply, and a benign macro backdrop keep yields on a downward trajectory. Investors should monitor upcoming inflation prints and auction subscription results for confirmation.

Fund Performance. The Fund gained by 0.25% for the month, 14 basis points below its benchmark.

Fund Strategy. The Fund aims to maintain its duration position as interest rates are expected to decline in the medium term. Inflation has significantly eased, mainly driven by a gradual reduction in rice prices. In response, the BSP has continued to reduce its policy rate, which now stands at 5.25%. The central bank has also indicated the possibility of further rate cuts, supported by a favorable macroeconomic backdrop. However, market volatility may persist due to ongoing uncertainties in the global economic landscape, particularly due to the rapidly evolving US trade policies. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
