OUTLOOK AND STRATEGY

Market Review. The Philippine fixed income market experienced a relatively stable month in March 2025, with modest movements in yields and continued investor interest in government securities. The BPI Philippine Government Bond Index returned 0.44% for the month as rates crept higher by 0.7 bps on average, mostly on the very short end of the curve. Both domestic and international factors, including central bank policies, inflation trends, and geopolitical developments affected yield movements for the period. The Bangko Sentral ng Pilipinas (BSP) kept its key policy rate at 5.75%, citing the need to balance inflation control with economic growth. Inflation for the month of February remained within the target range at 2.1.% year-on-year, although there were concerns about potential upward pressures from global commodity prices. Demand for government securities remained strong, particularly for short to medium-term bonds. The Bureau of the Treasury successfully auctioned off several tranches of Treasury bills and bonds, with yields awarded slightly lower than the previous month. Demand was quite healthy with oversubscriptions seen across all tenors, particularly the 5- and 7-year papers. Overall market sentiment was positive, supported by stable macroeconomic indicators and a favorable investment climate. Nonetheless, investors remained cautious amid the potential impact of US President Trump's tariffs on growth and inflation.

Fund Performance. The Fund gained by 0.41% for the month, 11 basis points below its benchmark.

Fund Strategy. The Fund looks to maintain its duration position as interest rates are expected to decline in the medium term. While inflation has settled within the BSP's target in the past months, upside risks are still present. The BSP has already decreased its policy rates by 75 basis points to 5.75% in 2024. The central bank remains vigilant in monitoring inflation figures before easing rates further. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
