**CLIENT SUITABILITY**

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if it is suited to his/her investment objective and risk tolerance before deciding to invest. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from our website.

This Fund is for investors who:

- Are at least classified as conservative based on their risk profile
- Have an investment horizon of at least one (1) year

**KEY RISKS AND RISK MANAGEMENT**

**Interest Rate Risk:** The fund invests in short term domestic fixed income securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/events and/or negative developments in domestic political and economic conditions.

**Liquidity Risk:** Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

**Credit/Default Risk:** Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

**Related Party Risk:** Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

### <sup>4</sup>BENCHMARK INFORMATION

**Name:** 91-day Philippine Treasury Bill, net of tax

**Description and Key Characteristics:** Treasury Bills are zero coupon peso-denominated short-term fixed income securities issued by the Republic of the Philippines through its Bureau of Treasury.

**Relation to the Fund's Objective or Investment Strategy:** The Fund is actively managed, allowing the Trustee full discretion on security selection. Given the Fund's primary objective of capital preservation for investors with a short-term horizon, the 91-day Treasury Bill, a liquid security that is representative of attainable short-term placements, is an appropriate benchmark. Investors may use the benchmark to gauge the Fund's performance.

Information about the benchmark may be accessed through Philippine Depository & Trust Corp. <https://www.pds.com.ph/>. Alternatively, participants may request information from BPI Wealth at [bpiwealth@bpi.com.ph](mailto:bpiwealth@bpi.com.ph).

## OUTLOOK AND STRATEGY

**Market Review.** In December, local bond yields posted a month-on-month increase of 10.26 basis points across the curve. Short-term yields of one year and below bucked the trend, declining by an average of 3.22 basis points. The rise in yields was most pronounced in the intermediate segment as investors took profits toward year-end. Five- and seven-year tenors saw the largest increases at 22.91 basis points and 20.51 basis points, respectively, followed by the three-year tenor, which rose by 19.09 basis points. Meanwhile, long-end yields rose by around 8.24 basis points amid growing concerns over economic growth prospects.

The BPI Money Market Index gained 0.32%, while the BPI 1–5 Year Index edged down by 0.01% and the BPI GS Overall Index declined by 0.16%.

On the macro front, November inflation settled at 1.5%, remaining below the government's 2% to 4% target range and easing from October's 1.7% print. The BSP maintained a dovish stance, reinforcing market expectations for further policy easing after cutting the monetary policy rate in December, with the possibility of additional cuts in 2026. Following the latest rate cut, the policy rate stands at 4.5%, with markets pricing in a potential move toward 4.0% in 2026.

**Fund Performance.** The Fund returned 0.31% during the month, underperforming the benchmark by a basis point.

**Fund Strategy.** The Fund favors the safety of shorter-dated securities and time deposits. With the expectation of rate cuts this year due to favorable macro economic conditions, the fund manager aims to lock in yields by extending duration of the fund.
