KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Market/Price Risk: Investors are exposed to adverse changes in the prices of foreign currency denominated fixed income instruments of the target funds due to a rise in interest rates as a result of adverse market conditions, unfavorable developments in the political and economic conditions of countries where the underlying securities of the target funds are issued or traded, or other issuer-specific factors.

Liquidity Risk: Investors are exposed to the risk of loss due to the inability of the target funds to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited participants in the market, low trading volumes, market disruptions, among others.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of fixed income securities of the target funds due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/events and/or negative developments in political and economic conditions.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/debt issuer to make timely interest and/or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in political and economic conditions.

FX Risk: Investors are exposed to the risk of loss from a decline in the market value of the target fund when the underlying securities of the target funds are translated to USD.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

BENCHMARK INFORMATION ⁵

Name	Description and Key Characteristics
MSCI All Country World Index Net Total Return USD Index	<p>The MSCI ACWI Index, MSCI's flagship global equity index, is designed to represent performance for the full opportunity set of large- and mid-cap stocks across 23 developed and 24 Emerging Markets. With 2,757 constituents, the index covers approximately 85% of the global investable equity opportunity set.</p> <p>The index is based on the MSCI Global Investable Market Indexes (GIMI) Methodology – a comprehensive and consistent approach to index construction that allows for meaningful global views and cross regional comparisons across all market capitalization size, sector and style segments and combinations. This methodology aims to provide exhaustive coverage of the relevant investment opportunity set with a strong emphasis on index liquidity, investability and replicability.</p> <p>The MSCI Total Return Indices measure the market performance, including price performance and income from regular cash distributions (cash dividend payments or capital repayments). MSCI's Daily Total Return (DTR) methodology reinvests regular cash distributions in indices on the ex-date of such distributions.</p>
Bloomberg Barclays Global Aggregate Bond Index (Unhedged)	<p>The Bloomberg Global Aggregate Index is a flagship measure of global investment grade debt from twenty-eight local currency markets. This multi-currency benchmark includes treasury, government-related, corporate and securitized fixed-rate bonds from both developed and emerging markets issuers. A component of the Multiverse Index, the Global Aggregate Index was created in 2000, with index history backfilled to January 1, 1990.</p>

OUTLOOK AND STRATEGY

Market Review. Global equities were broadly flat in November, with the MSCI ACWI Total Return Index up just 0.04% in USD terms. U.S. markets showed mixed performance, with the S&P 500 and Dow posting modest gains while the Nasdaq slipped as investors rotated out of mega-cap tech. Sentiment was shaped by expectations of another Federal Reserve rate cut in December following October's 25 bps reduction and the end of quantitative tightening starting December.

In Europe, inflation ticked up slightly to 2.2% year-on-year, keeping the ECB cautious in its policy actions. Equity markets were volatile, with the market expressing AI valuation concerns before share prices stabilized toward month-end. Japan's Nikkei 225 fell 4.1%, posting the first monthly decline in eight months as profit-taking hit semiconductor and AI-linked stocks despite hitting earlier record highs.

Asia ex-Japan underperformed, down about 2.8%, as semiconductor-heavy markets like Korea and Taiwan saw sharp swings. Korea's early gains on chip optimism reversed mid-month, while Taiwan's exports surged 56% year-on-year supported by AI-driven demand. Overall, November marked a consolidation phase, with global markets digesting policy signals and recalibrating after strong prior-month rallies.

Within the fixed income space, global fixed income assets recovered in November as expectations for interest rate cuts gained momentum. Early in the month, yields were elevated after US Federal Reserve Chair Jerome Powell said further cuts were not guaranteed, making investors cautious about a third consecutive cut at the December meeting.

As the month progressed, sentiment shifted towards a December rate cut. Softer economic data including weaker retail sales, downward revisions in jobs growth, and unemployment rising to a four-year high of 4.4% supported the case for easing. Dovish comments from key Fed officials also reinforced these expectations, helping bond markets rebound.

Outside the US, bond yield movements were mixed. Germany's 10-year Bund ended at 2.69% (+5 bps), the UK's 10-year Gilt at 4.44% (+3 bps), and Japan's 10-year government bond at 1.81% (+14 bps). Japan stood out as yields climbed sharply after the Bank of Japan signaled possible rate hikes amid inflation rising to 2.8%, above the 2.4% forecast. In the Philippines, dollar-denominated bond yields rose after GDP growth came in at 4%, well below expectations. The JP Morgan Asia Credit Index – Philippines posted a negative return of 0.25%.

Fund Performance. The fund returned -0.31%, underperforming the benchmark by 45 basis points. Security selection within the fund detracted from performance.

Fund Strategy. We expect major structural trends in sustainability, such as increasing market share of electric vehicles and record installation of wind turbines and solar panels, to continue. The ongoing Russia-Ukraine war, has resulted in the world, particularly Europe, determined to reduce their reliance on traditional sources of energy such as oil in gas, requiring large investments in renewable energy in the coming years. In addition, we continue to see support for green technologies through government policies across the globe. We believe that strong ESG companies are likely to generate positive financial performance over time as investing in sustainability can deliver higher growth and returns through innovation, higher operational efficiency and better risk management.
