OUTLOOK AND STRATEGY

Market Review. Global equities continued to climb, with the MSCI All Country World Equity Index up by 2.36% MoM. In August, sentiment was initially dampened by further developments in US trade negotiations, including the imposition of a 25% additional tariff on India, 35% tariffs on Canadian goods, and new reciprocal tariff rates on several countries. However, markets rebounded as dovish remarks from Fed officials, including Chair Powell's signal of a potential September rate cut, lifted investor sentiment. Stocks were further supported by above-consensus 2Q25 corporate earnings results and a softer-than-expected July US CPI inflation print of 2.7% YoY.

European and Asian markets continued to outperform in August, buoyed by monetary easing, resilient corporate earnings, and sector-specific tailwinds. The Euro Stoxx 50 rose 2.9% in USD terms supported by gains in energy and consumer discretionary sectors, particularly automotive stocks which benefited from a late-July tariff agreement with the U.S. Meanwhile, defense-related names declined slightly amid progress in security talks around Ukraine.

Japan's Nikkei 225 surged 4.0%, reaching a new all-time high mid-month. The rally was driven by a weaker yen, a favorable U.S.-Japan trade deal, and strong earnings in technology and manufacturing, especially in semiconductors and AI-linked sectors.

The August data highlights a global rotation toward markets benefiting from monetary stimulus and sectoral momentum, particularly in defense, infrastructure, and technology. As inflation pressures ease in parts of Europe and Asia and central banks signal dovish intentions, investor appetite for non-U.S. equities continues to grow. This reflects a shifting macroeconomic landscape, where policy support and sectoral strength are driving performance outside the U.S.

Fund Performance. The fund returned -0.36%, lagging the benchmark by 283 basis points. Security selection within the fund detracted performance.

Fund Strategy. We expect major structural trends in sustainability, such as increasing market share of electric vehicles and record installation of wind turbines and solar panels, to continue. The new US administration presents intriguing investment avenues, but also introduces uncertainties for global markets, particularly regarding punitive tariffs against US trading partners, retaliative tariffs against the US and US dollar strengthening. While sustainability-related investment themes may face challenges under the Trump administration, historical precedent suggests that fears may not match reality. In addition, we continue to see support for green technologies through government policies in other parts of the globe. We believe that strong ESG companies are likely to generate positive financial performance over time as investing in sustainability can deliver higher growth and returns through innovation, higher operational efficiency and better risk management.
