OUTLOOK AND STRATEGY

Market Review. Global equities posted mixed results in May 2025, with U.S. markets showing modest gains while Europe and Japan outperformed. The S&P 500 edged up just 0.4% as investor sentiment remained cautious amid lingering inflation concerns and uncertainty around Federal Reserve policy. In contrast, European equities surged, driven by the European Central Bank's April rate cut and a rebound in industrial activity. Markets in Poland, Austria, and Greece led the charge, with year-to-date returns exceeding 30% in some cases.

Japan's Nikkei also delivered a solid performance, rising 7.7% in May, supported by a weaker yen and strong corporate earnings in the tech and manufacturing sectors. The divergence in performance highlighted a global rotation toward markets benefiting from monetary easing and cyclical recovery, while U.S. equities lagged due to valuation pressures and geopolitical headwinds. Overall, May underscored the growing appeal of non-U.S. markets amid shifting macroeconomic dynamics.

The MSCI ACWI Information Technology 10/40 Index, returned 10.4% for the month.

Fund Performance. The fund returned 12.51% in May, outperforming the benchmark by 210 basis points.

Fund Strategy. We believe the fundamentals of the technology companies we invest in remain compelling. The secular growth trends driving technology are multi-year transformations that we expect to persist, regardless of the macroeconomic environment or geopolitical risk.

The market's drop has opened up great opportunities to invest in strong AI companies. We're carefully adding firms with clear ways to make money from AI at lower prices. We've also adjusted our portfolio to reduce investments in hardware makers affected by tariffs and increased investments in U.S. onshoring leaders.

AI, cloud computing, and quantum computing remain our core holdings. Short-term market fluctuations provide a good environment for active stock picking, as the growth in AI infrastructure and expanding tech advantages are more significant than temporary market noise.
