INVESTMENT OBJECTIVE AND STRATEGY

The Fund aims to achieve long-term capital and income growth by investing in a diversified portfolio of fixed income and equity securities. The Fund aims to outperform its benchmark which is composed of 50% BPI Philippine Government Bond Index and 50% Philippine Stock Exchange Total Return Index (PSEi TRI).

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Odyssey Diversified Balanced Fund is suitable for investors who:

- Are at least classified as aggressive based on their risk profile
- Have an investment horizon at least five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk:	Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions..
Equity Price Risk:	Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Related Party Risk	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.
Credit/ Default Risk	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

BENCHMARK INFORMATION

Name: The PSEi Total Return Index (PSEi TRI)

Date of Change: January 2, 2025

Description and Reason for Change: The Philippine Stock Exchange Index or PSEi is the main index of the Philippine Stock Exchange. The PSEi is a free float-adjusted market capitalization-weighted index of the 30 largest and most active common stock. The PSEi Total Return Index (PSEi TRI) covers both price performance and income from dividend payments by reinvesting cash dividends back to the PSEi according to each constituent's respective market capitalization weightings. The change in the fund's benchmark from PSEi to PSEi TRI is mainly to satisfy the characteristics of a valid benchmark for a UITF in the BSP Circular No. 1178, and to conform with the Global Investment Performance Standards (GIPS) requirement for firms to select an appropriate total return benchmark when available.

Information about the benchmark may be accessed through Philippine Stock Exchange <https://www.pse.com.ph/>. Alternatively, participants may request information from BPI Wealth at bpiwealth.com.ph.

OUTLOOK AND STRATEGY

Market Review. In August, the Philippine fixed income market showed mixed performance across tenors, reflecting cautious investor sentiment amid global and domestic developments. The Retail Treasury Bonds Tranche 31 (RTB-31), a five-year peso-denominated bond, was also launched, priced at a final coupon of 6.00% per annum. The offering attracted strong investor interest, raising PHP210 billion from PHP354.18 billion in tenders on the first day of the offer period. For this issuance, the government raised a total of PHP507 billion.

Philippine inflation eased to 0.9% in July, well below the target range of 2-4%, further supporting bond market stability. As a result, the Bangko Sentral ng Pilipinas reduced its policy rate by 25 bps to 5.00%, marking a continuation of its easing cycle. BSP Governor Eli Remolona described it as a "Goldilocks rate", designed to stimulate economic activity while keeping inflation in check. Performance across BPI's domestic fixed income indices reflected this easing bias. The BPI GS Overall Index returned 1.08%, led by the BPI GS 5+ Index, which gained 1.54%. Shorter-duration indices posted more modest returns, with the BPI GS 1-3 Index up 0.53% and the Money Market Index rising 0.37%.

Looking ahead, the outlook remains cautiously optimistic. Locally, the benign inflation environment and the BSP's recent 25 bps rate cut for overnight borrowing (and 5.50% for lending) provide further support for lower yields.

The Philippine Stock Exchange Index (PSEi) slid for the second straight month on persistent foreign selling. Investors digested quite an eventful month with key macro-economic events happening on both local and foreign fronts, along with two major rebalancing days. On the local space, the market took cues from regulatory news on e-gaming and telecommunication, a deceleration in July Inflation, underwhelming second quarter corporate earnings and a third consecutive rate cut by the Bangko Sentral ng Pilipinas (BSP). Meanwhile in the US, market sentiment was driven by the lower-than-expected US Non-farm payrolls early in the month, and the US Federal Reserve's commentary which signaled a higher chance of a rate cut in September. Furthermore, two major rebalancing events spurred activity in the equities market namely the Philippine Stock Exchange Index Semi Annual Review and MSCI Quarterly Review. For the PSEi rebalancing, PLUS, despite being hounded by regulatory issues, was added to the main index, replacing BLOOM. Meanwhile for the MSCI rebalancing, RCR and PNB got added in the small cap index while DNL got deleted. The local bourse closed at 6,155.57 or 1.55% lower month-on-month.

The PSEi saw an increased level of activity with Average Daily Turnover registering at Php7.2billion in August, 9.67% month-on-month. Meanwhile, foreigners continued to be risk-averse with outflows accelerating to US\$74 million, the fifth straight month of net foreign selling. Foreign participation recorded at 46%.

On a per stock basis, the top three index gainers for the month include: GTCAP (+15.10%), JGS (+13.33%) and ALI (+12.00%). Meanwhile, the bottom three performers were: CNVRG (-21.70%), SMC (-15.16%) and TEL (-12.00%).

Fund Performance. The Fund returned -0.38% in August, lower than the benchmark by 27 basis points. Year-to-date, the Fund registered a gain of 1.47%, above the benchmark by 85 basis points.

Fund Strategy. The Fund looks to gradually increase its duration position as interest rates are expected to fall over the next few months. Local inflation has settled within the BSP's target in the past months and is expected to be manageable. After easing its policy rates by a total of 50 basis points in the first half of 2025, the BSP remains vigilant in monitoring inflation figures before considering further rate cuts. Volatility may persist in the near term driven by global factors, and the portfolio will be actively managed to take advantage of this. Investors in the bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium - to - long term horizon. As for Equities, The Fund will be defensive as volatility from international trade (US Tariffs) and geopolitics persist. The preference is for companies with leading market capitalization, good fundamentals as well as high dividend paying stocks.

LIST OF PROSPECTIVE INVESTMENTS

The following are among the Fund's approved investment outlets, wherein the Trustee intends to invest depending on strategy, availability, or other market-driven circumstances:

- (a) Bank deposits and such other investments allowed under regulations issued by the BSP;
- (b) Securities issued by or guaranteed by the Philippine government, or by the BSP;
- (c) Tradable securities issued or guaranteed by multilateral institutions such as the Asian Development Bank (ADB), International Monetary Fund (IMF) and World Bank;
- (d) Tradable securities issued by the government of a foreign country, any political subdivision of a foreign country or any supranational entity;
