*Monthly rate: billings received for July 2025 divided by the average daily NAV for the same month valued at Php 700.50 Mn

**Monthly rate: billings received for June 2025 divided by the average daily NAV for the same month valued at Php 697.97 Mn

***Billing is received at the last quarter of the year

INVESTMENT OBJECTIVE AND STRATEGY

The Fund aims to achieve long-term capital and income growth by investing in a diversified portfolio of fixed income and equity securities. The Fund aims to outperform its benchmark which is composed of 50% BPI Philippine Government Bond Index and 50% Philippine Stock Exchange Total Return Index (PSEi TRI).

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Odyssey Diversified Balanced Fund is suitable for investors who:

- Are at least classified as aggressive based on their risk profile
- Have an investment horizon at least five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk:	Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions..
Equity Price Risk:	Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Related Party Risk	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.
Credit/ Default Risk	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

BENCHMARK INFORMATION

Name: The PSEi Total Return Index (PSEi TRI)

Date of Change: January 2, 2025

Description and Reason for Change: The Philippine Stock Exchange Index or PSEi is the main index of the Philippine Stock Exchange. The PSEi is a free float-adjusted market capitalization-weighted index of the 30 largest and most active common stock. The PSEi Total Return Index (PSEi TRI) covers both price performance and income from dividend payments by reinvesting cash dividends back to the PSEi according to each constituent's respective market capitalization weightings. The change in the fund's benchmark from PSEi to PSEi TRI is mainly to satisfy the characteristics of a valid benchmark for a UITF in the BSP Circular No. 1178, and to conform with the Global Investment Performance Standards (GIPS) requirement for firms to select an appropriate total return benchmark when available.

Information about the benchmark may be accessed through Philippine Stock Exchange <https://www.pse.com.ph/>. Alternatively, participants may request information from BPI Wealth at bpiwealth.com.ph.

OUTLOOK AND STRATEGY

Market Review. The bond market was relatively flat end-July as participants stayed sidelined ahead of final details on the new RTB tranche, with the 10-year benchmark going down only about 2 bps on the month. Headline inflation printed benignly in July at roughly 0.9% year-on-year. At the same time, growth remains positive, with Q2 2025 GDP expanding around 5.5% year-on-year. Overall, the macro backdrop tilted toward lower rates, reflecting low inflation, still-solid growth, and subdued volatility. Liquidity conditions stayed orderly, with limited knee-jerk moves across the curve. This combination left yields narrowly traded and anchored just below recent levels.

The Bureau of the Treasury announced RTB 519 with an initial offer size of PHP 200bn, pricing scheduled for 5 August, a public offer window through 15 August, and settlement on 20 August. Market expectations are that the accepted size will exceed the initial PHP 200bn, driven largely by the sizable R-513 maturity in August of around PHP 500bn, which will create strong rollover demand from institutional holders.

Looking ahead, the bias remains toward lower yields as benign inflation, slower growth and fading trade policy-related volatility. The combination of slower but still positive growth and the prospect of very strong demand for RTB 519 suggests continued compression, particularly in the belly of the curve. Key risks that could derail this path include a sudden global risk-off episode, materially higher imported inflation, or a surprise change in BSP guidance. For now, however, the prevailing view is that subdued inflation, ample demand for government supply, and a benign macro backdrop keep yields on a downward trajectory. Investors should monitor upcoming inflation prints and auction subscription results for confirmation.

The Philippine Stock Exchange Index (PSEi) suffered a 1.8% decline in July following a myriad of domestic and international macro-economic developments. The PSEi started off strong, on-pace to what it seemed like a breakout of the 6,500 level until overnight secondary share placements from two index heavyweights SM and SMPH pulled the market back. Corporate earnings also started to come out with mixed results. Meanwhile, on the international front, the US and the Philippines reached a tariff deal where Philippine exports to US will be levied by 19% while the US being charged with zero. Towards the end of the month, the benchmark index slumped even further as the peso weakened back to the 58-level following the US dollar's strength. The US Federal Reserve held its FOMC meeting where they decided to keep interest rates unchanged. After which, expectations of further rate cuts were somewhat trimmed following several favorable US economic data such as US Personal Consumption Expenditure still recording above targets and strong 2nd quarter US GDP at 3.0% quarter-on-quarter. The PSEi breached below the 6,300 level to close at 6,252.73 in July.

In terms of trading activity, the PSEi recorded an Average Daily Turnover of Php6.5 billion in July, or 1.07% lower on a month-on-month basis. Meanwhile, foreigners are still net sellers for the fourth straight month at US\$29 million, but with lower participation at 47%.

On a per stock basis, the top three index gainers for the month include: PGOLD (+11.11%), ICT (+9.00%) and EMI (+8.58%). Meanwhile, the bottom three performers were: BLOOM (-20.55%), AGI (-14.63%) and AEV (-9.17%).

Fund Performance. The Fund returned 0.93% in July, higher than the benchmark by 46 basis points. Year-to-date, the Fund registered a gain of 2.27%, above the benchmark by 98 basis points.

Fund Strategy. The Fund looks to gradually increase its duration position as interest rates are expected to fall over the next few months. Local inflation has settled within the BSP's target in the past months and is expected to be manageable. After easing its policy rates by a total of 50 basis points in the first half of 2025, the BSP remains vigilant in monitoring inflation figures before considering further rate cuts. Volatility may persist in the near term driven by global factors, and the portfolio will be actively managed to take advantage of this. Investors in the bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium - to - long term horizon. As for Equities, the Fund will be opportunistic on market dips as volatility from uncertainties in international trade (US Tariffs) and geopolitics prevail. The preference is for companies with leading market capitalization, good fundamentals as well as high dividend paying stocks.

LIST OF PROSPECTIVE INVESTMENTS

The following are among the Fund's approved investment outlets, wherein the Trustee intends to invest depending on strategy, availability, or other market-driven circumstances:

- (a) Bank deposits and such other investments allowed under regulations issued by the BSP;
- (b) Securities issued by or guaranteed by the Philippine government, or by the BSP;
- (c) Tradable securities issued or guaranteed by multilateral institutions such as the Asian Development Bank (ADB), International Monetary Fund (IMF) and World Bank;
- (d) Tradable securities issued by the government of a foreign country, any political subdivision of a foreign country or any supranational entity;
- (e) Exchange-listed securities;
- (f) Marketable instruments that are traded in an organized exchange;
- (g) Loans traded in an organized market; and
- (h) Such other tradable investments outlets/categories as may be approved by the relevant authority and allowed by the BSP.
