KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest	Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions..
Rate Risk:	
Equity	Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.
Price Risk:	
Liquidity	Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Risk:	
Related	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.
Party Risk	
Credit/	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.
Default	
Risk	

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

BENCHMARK INFORMATION

Name: The PSEi Total Return Index (PSEi TRI)

Date of Change: January 2, 2025

Description and Reason for Change: The Philippine Stock Exchange Index or PSEi is the main index of the Philippine Stock Exchange. The PSEi is a free float-adjusted market capitalization-weighted index of the 30 largest and most active common stock. The PSEi Total Return Index (PSEi TRI) covers both price performance and income from dividend payments by reinvesting cash dividends back to the PSEi according to each constituent's respective market capitalization weightings. The change in the fund's benchmark from PSEi to PSEi TRI is mainly to satisfy the characteristics of a valid benchmark for a UITF in the BSP Circular No. 1178, and to conform with the Global Investment Performance Standards (GIPS) requirement for firms to select an appropriate total return benchmark when available.

Information about the benchmark may be accessed through Philippine Stock Exchange <https://www.pse.com.ph/>. Alternatively, participants may request information from BPI Wealth at bpiwealth.com.ph.

OUTLOOK AND STRATEGY

Market Review. In June, the Philippine bond market saw significant ups and downs. This was mainly because of a brief conflict between Israel and Iran, which caused oil prices to jump and raised concerns about inflation. The 10-year Philippine bond yield rose by as much as 16 basis points before ending the month two basis points higher. As such, the BPI Philippine Government Bond Index returned 0.28%, bringing the first half of 2025 return to 2.47%. Meanwhile, the BPI Philippine Government Bond 1-5 Year Index returned 0.35%, with first half 2025 return at 3.04%. Aside from the Israel-Iran war, investors also weighed local and global macroeconomic developments. Philippine inflation further fell to 1.3% in May, from 1.4% in April. In addition, the Bangko Sentral ng Pilipinas cut the policy rate by 25 basis points to 5.25%. In the US, the Federal Reserve kept rates steady at 4.25%-4.50%, as policymakers await more data to better assess the impact of US import tariffs on the economy. Looking ahead, we expect market volatility to continue due to global uncertainties, especially around US trade policies and geopolitical tensions. However, the local environment remains favorable for bond investments, thanks to low inflation, slower economic growth, dovish central bank, and fewer government bond auctions. Towards the end of June, the Bureau of the Treasury released its auction schedule for the third quarter, which showed an 11% decline in offering volume versus the initial schedule in the second quarter.

The Philippine Stock Exchange index (PSEi) traded sideways most of the month as the market digested a mix bag of macro-economic developments. Investor optimism was evident on the release of May inflation print which turned out better than expected. This, in turn, fueled bets of another round of rate cuts by the Bangko Sentral ng Pilipinas (BSP). However, optimism soon turned into jitters on renewed geopolitical tensions in the Middle East leading to a spike in global oil prices and weakening of the Peso. Towards the latter part of the month, the market saw FTSE rebalancing where the country registered a down-weight en-route to a net foreign outflow. The PSEi rose modestly by 0.37% month-on-month to 6,364.94 in June. In terms of trading activity, the PSEi recorded a healthy Average Daily Turnover of Php6.642 billion in June. Meanwhile, foreigners remained net sellers for the third straight month at US\$72 million, partly due to FTSE rebalancing. On a per stock basis, the top three index gainers for the month include: BLOOM (+22.25%), ALI (+17.39%) and PGOLD (+16.13%). Meanwhile, the bottom three performers were: CBC (-10.12%), BPI (-6.54%) and BDO (-5.09%).

Fund Performance. The Fund registered a gain of 0.65% in June, below the benchmark by 25 basis points. Year-to-date, the Fund registered a gain of 2.18%, above the benchmark by 37 basis points.

Fund Strategy. The Fund looks to gradually increase its duration position as interest rates are expected to fall over the next few months. Local inflation has settled within the BSP's target in the past months and is expected to be manageable. After easing its policy rates by a total of 50 basis points in the first half of 2025, the BSP remains vigilant in monitoring inflation figures before considering further rate cuts. Volatility may persist in the near term driven by global factors, and the portfolio will be actively managed to take advantage of this. Investors in the bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium - to - long term horizon. As for Equities, the Fund will be opportunistic on market dips as volatility from the global front remains given sporadic situation over in the Middle East. The preference is for companies with leading market capitalization, good fundamentals and high dividend paying stocks.
