### KEY RISKS AND RISK MANAGEMENT

**Interest Rate Risk:** The fund invests in short term domestic fixed income securities, exposing investors to the risk of loss arising from rise in interest rates, which generally causes fixed income security prices to decline. Factors/events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/events and/or negative developments in domestic political and economic conditions.

**Equity Price Risk:** Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

**Liquidity Risk:** Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/sellers in the market, low trading volumes or market disruptions, among other reasons/ factors

**Related Party Risk:** Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

**Credit/Default Risk:** Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

### <sup>4</sup> BENCHMARK INFORMATION

Name	Description and Key Characteristics
<b>PSEi Total Return Index (PSEi TRI)</b>	The Philippine Stock Exchange Index or PSEi is the main index of the Philippine Stock Exchange. The PSEi is a free float-adjusted market capitalization-weighted index of the 30 largest and most active common stock.  The PSEi Total Return Index (PSEi TRI) covers both price performance and income from dividend payments by reinvesting cash dividends back to the PSEi according to each constituent's respective market capitalization weightings.
<b>BPI Philippine Government Bond 1-5 Year Index</b>	The BPI Philippine Government Bond Index (the BPI Index) is sponsored by the Bank of the Philippine Islands (the Sponsor). The Sponsor is responsible for the design of the BPI Index and the issuance of these Rules.  The BPI Index is intended to reflect the performance of Philippine Government, fixed-rate straight bonds denominated in Philippine Peso. It is intended to be a template for passive, diversified fixed income investment portfolios where securities are held in proportion to the market value (Market Capitalization) of the issued securities. It aims to provide accurate and objective benchmarks by which to assess the performance of the Philippine Government bond market.

Details about the equity benchmark component can be accessed through the Philippine Stock Exchange website at <https://www.pse.com.ph>. For information regarding the fixed income benchmark component, participants may contact the calculating agent, BPI Investments Inc, via email at [bpi\\_investment@bpi.com.ph](mailto:bpi_investment@bpi.com.ph). Alternatively, inquiries may also be directed to BPI Wealth at [bpiwealth@bpi.com.ph](mailto:bpiwealth@bpi.com.ph).

<sup>5</sup> Effective January 2, 2025, the Fund's benchmark changed from 30% Philippine Stock Exchange Index (PSEi) + 70% BPI Philippine Government Bond 1-5 Year Index to 30% PSEi Total Return Index (PSEi TRI) + 70% BPI Philippine Government Bond 1-5 Year Index to ensure alignment with BSP Circular No. 1178, Guidelines on the Use of Benchmarks for UITFs.

## OUTLOOK AND STRATEGY

**Market Review.** In December, local bond yields posted a month-on-month increase of 10.26 basis points across the curve. Short-term yields of one year and below bucked the trend, declining by an average of 3.22 basis points. The rise in yields was most pronounced in the intermediate segment as investors took profits toward year-end. Five- and seven-year tenors saw the largest increases at 22.91 basis points and 20.51 basis points, respectively, followed by the three-year tenor, which rose by 19.09 basis points. Meanwhile, long-end yields rose by around 8.24 basis points amid growing concerns over economic growth prospects. The BPI Money Market Index gained 0.32%, while the BPI 1–5 Year Index edged down by 0.01% and the BPI GS Overall Index declined by 0.16%. On the macro front, November inflation settled at 1.5%, remaining below the government's 2% to 4% target range and easing from October's 1.7% print. The BSP maintained a dovish stance, reinforcing market expectations for further policy easing after cutting the monetary policy rate in December, with the possibility of additional cuts in 2026. Following the latest rate cut, the policy rate stands at 4.5%, with markets pricing in a potential move toward 4.0% in 2026.

The Philippine Stock Exchange (PSEi) ended the year on a positive note and managed to close above the psychological 6,000 level. Lower-than-expected domestic November inflation print and rate cuts from both the US Federal Reserve (The Fed) and the Bangko Sentral ng Pilipinas' provided the lift. Meanwhile, ongoing worries over the country's slowing economic growth, peso weakness and foreign selling capped the upside. The PSEi closed 2025 at 6,052.92 or +0.51% on a month-on-month basis. Trading activity slowed in December, with Average Daily Turnover at Php5.73 billion or 7.7% lower than in prior month's Php6.22 billion. Foreigners were net sellers with a hefty US\$202 million and were more active at 54% participation. On a per stock basis, the top three index gainers for the month include: AGI (+16.50%), ALI (+10.32%) and CBC (+9.83%). Meanwhile, the bottom three performers were: PLUS (-33.88%), PGOLD (-9.52%) and SM (-5.47%).

**Fund Performance.** The Fund returned 0.00% in December, underperforming the benchmark by 15 basis points. Year-to-date, the Fund registered a gain of 2.34%, below the benchmark by 72 basis points.

**Fund Strategy.** The Fund looks to gradually increase its duration position as interest rates are expected to fall over the next few months. Local inflation has settled within the BSP's target in the past months and is expected to be manageable. After easing its policy rates by a total of 50 basis points in the first half of 2025, the BSP remains vigilant in monitoring inflation figures before considering further rate cuts. Volatility may persist in the near term driven by global factors, and the portfolio will be actively managed to take advantage of this. Investors in the bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium - to - long term horizon. As for Equities, the Fund will remain defensive given heightening geopolitical tensions, peso depreciation and evolving local political risks. The Fund's preference is for companies with leading market capitalization, clear earnings growth drivers, dividend-paying and high-yielding.
