A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust / Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Odyssey Peso Bond Fund is suitable only for investors who:

- Are at least classified as aggressive based on their risk profile
- Have an investment horizon of more than five (5) years

**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

**Interest Rate Risk:** The fund invests in a long-term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

**Liquidity Risk:** Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

**Credit/ Default Risk:** Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

**Related Party Risk:** Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

## OUTLOOK AND STRATEGY

**Market Review.** The bond market was relatively flat end-July as participants stayed sidelined ahead of final details on the new RTB tranche, with the 10-year benchmark going down only about 2 bps on the month. Headline inflation printed benignly in July at roughly 0.9% year-on-year. At the same time, growth remains positive, with Q2 2025 GDP expanding around 5.5% year-on-year. Overall, the macro backdrop tilted toward lower rates, reflecting low inflation, still-solid growth, and subdued volatility. Liquidity conditions stayed orderly, with limited knee-jerk moves across the curve. This combination left yields narrowly traded and anchored just below recent levels.

The Bureau of the Treasury announced RTB 519 with an initial offer size of PHP 200bn, pricing scheduled for 5 August, a public offer window through 15 August, and settlement on 20 August. Market expectations are that the accepted size will exceed the initial PHP 200bn, driven largely by the sizable R-513 maturity in August of around PHP 500bn, which will create strong rollover demand from institutional holders.

Looking ahead, the bias remains toward lower yields as benign inflation, slower growth and fading trade policy-related volatility. The combination of slower but still positive growth and the prospect of very strong demand for RTB 519 suggests continued compression, particularly in the belly of the curve. Key risks that could derail this path include a sudden global risk-off episode, materially higher imported inflation, or a surprise change in BSP guidance. For now, however, the prevailing view is that subdued inflation, ample demand for government supply, and a benign macro backdrop keep yields on a downward trajectory. Investors should monitor upcoming inflation prints and auction subscription results for confirmation.

**Fund Performance.** The Fund posted a return of 0.54% for the month of July, below the benchmark by 4 basis points.

**Fund Strategy.** The Fund aims to maintain its duration position as interest rates are expected to decline in the medium term. Inflation has significantly eased, mainly driven by a gradual reduction in rice prices. In response, the BSP has continued to reduce its policy rate, which now stands at 5.25%. The central bank has also indicated the possibility of further rate cuts, supported by a favorable macroeconomic backdrop. However, market volatility may persist due to ongoing uncertainties in the global economic landscape, particularly due to the rapidly evolving US trade policies. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
