KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a long-term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The Philippine fixed income market experienced a relatively stable month in March 2025, with modest movements in yields and continued investor interest in government securities. The BPI Philippine Government Bond Index returned 0.44% for the month as rates crept higher by 0.7 bps on average, mostly on the very short end of the curve. Both domestic and international factors, including central bank policies, inflation trends, and geopolitical developments affected yield movements for the period. The Bangko Sentral ng Pilipinas (BSP) kept its key policy rate at 5.75%, citing the need to balance inflation control with economic growth. Inflation for the month of February remained within the target range at 2.1.% year-on-year, although there were concerns about potential upward pressures from global commodity prices. Demand for government securities remained strong, particularly for short to medium-term bonds. The Bureau of the Treasury successfully auctioned off several tranches of Treasury bills and bonds, with yields awarded slightly lower than the previous month. Demand was quite healthy with oversubscriptions seen across all tenors, particularly the 5- and 7-year papers. Overall market sentiment was positive, supported by stable macroeconomic indicators and a favorable investment climate. Nonetheless, investors remained cautious amid the potential impact of US President Trump's tariffs on growth and inflation.

Fund Performance. The Fund posted a return of 0.17% for the month of March, below the benchmark by 27 basis points.

Fund Strategy. The Fund looks to maintain its duration position as interest rates are expected to decline in the medium term. While inflation has settled within the BSP's target in the past months, upside risks are still present. The BSP has already decreased its policy rates by 75 basis points to 5.75% in 2024. The central bank remains vigilant in monitoring inflation figures before easing rates further. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
