## OUTLOOK AND STRATEGY

**Market Review.** In April, international fixed income investments reversed course and gained in value with the Bloomberg Barclays Global Aggregate Total Return Index returning 2.94% for the month. Global bonds initially took a tumble after April 2, the day that President Trump announced a minimum of 10% tariffs on all US imports. However, a week after, the tariffs for all countries except China, were put on hold for 90 days, a move which was quite welcome to the bond markets. On the local front, the JACI Philippine Total Return Index likewise gave a positive, albeit lower return of 0.28% of the month. Although there was no scheduled meeting for the Federal Reserve for the month of April, pronouncements from Fed Chairman Powell pointed towards a wait and see approach on the future effect of the tariffs. He believes the full impact of the tariffs haven't been felt yet with higher inflation, rising unemployment and an overall slowdown in economic growth looming over the next couple of months.

**Fund Performance.** The Fund returned -0.03% for the month, underperforming its benchmark by 32 basis points.

**Fund Strategy.** The Fund looks to maintain its duration position as interest rates are expected to decline in the medium term. Market volatility may persist due to ongoing uncertainties in the global economic landscape, particularly due to the rapidly evolving US trade policies. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
