**CLIENT SUITABILITY**

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if it is suited to his/her investment objective and risk tolerance before deciding to invest. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from our website.

This Fund is for investors who:

- Are at least classified as aggressive based on their risk profile
- Have an investment horizon of at least five (5) years

**KEY RISKS AND RISK MANAGEMENT**

**Interest Rate Risk:** The fund invests in a long-term portfolio of US Dollar denominated Philippine sovereign and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic and global political and economic conditions.

**Liquidity Risk:** Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/factors.

**Related Party Risk:** Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

**Credit/Default Risk:** Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic and global political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

### <sup>4</sup>BENCHMARK INFORMATION

**Name:** JPMorgan Asia Credit Index – Philippines Total Return

**Description and Key Characteristics:** The J.P. Morgan Asia Credit Index (JACI) launched on December 31, 1999, providing investors with a product that would aid in the evaluation and observation of investment opportunities in fixed rate US dollar-denominated bonds issued by Asia sovereigns, quasi-sovereigns, banks, and corporates. The main purpose of the index is to track the total return performance of a liquid and diverse universe of debt securities considered to be a fair representation of the asset class. The existing JACI contains majority of all fixed-rate bonds issued by Asia-domiciled entities having a nominal outstanding of at least \$300 million and more than one year to maturity. The JPMorgan Asia Credit Index – Philippines Total Return is a sub-index of JACI.

**Relation to the Fund's Objective or Investment Strategy:** The Fund is actively managed, which allows the Trustee full discretion on security selection. The Trustee will use the JPMorgan Asia Credit Index – Philippines Total Return as reference during portfolio construction to ensure that the active risk taken is commensurate to the Fund's objective and investor profile. Moreover, given the active nature of the Fund, the Trustee may select securities which are not within the benchmark index to take advantage of any opportunities available. Investors may use the Index to gauge the Fund's performance.

Information about the benchmark may be accessed through the J.P. Morgan website <https://www.jpmorgan.com/>. Alternatively, participants may request information from BPI Wealth at [bpiwealth@bpi.com.ph](mailto:bpiwealth@bpi.com.ph).

Investments in the said outlets were approved by the Committee. Likewise, all related party transactions are conducted on an arm's length and best execution basis and within established limits.

*\*Related party in accordance with BPI's internal policy.*

## OUTLOOK AND STRATEGY

**Market Review.** Global fixed income market saw mixed performances in October, with the Bloomberg Barclays Global Aggregate Total Return Index down by 0.25%. This came amid easing trade tensions between the US and China and shifting monetary policy expectations.

In the US, softer inflation allowed the Federal Reserve to cut rates by 25 basis points during its October meeting. However, Fed Chair Jerome Powell signalled that further cuts are not guaranteed, leading markets to anticipate a possible pause in the easing cycle. US Treasury yields declined across the curve, with the 2-year at 3.58%, the 10-year at 4.10%, and the 30-year at 4.67%.

Globally, long-term government bond yields also fell. The 10-year German Bund dropped to 2.65%, while the UK 10-year Gilt fell 28 basis points to 4.41%, following dovish comments from the Bank of England amid softer inflation and slower growth. Euro-area government bonds also saw declines, with Italian and Spanish 10-year yields down 18 and 11 basis points, respectively. Emerging market debt outperformed, returning 2.2%, supported by higher real yields and a weaker US dollar.

Meanwhile, Japanese government bonds underperformed, with 10-year yields rising slightly as markets anticipate further policy normalization from the Bank of Japan and potential fiscal expansion under new leadership.

Dollar-denominated Philippine bonds saw yields decline, particularly in longer maturities, resulting in a 0.68% monthly gain for the JP Morgan Asia Credit Index – Philippines. This was driven by price appreciation and stable interest income, in line with global trends.

**Fund Performance.** The Fund returned 0.51% for the month, underperforming its benchmark by 19 basis points.

**Fund Strategy.** The Fund looks to maintain its duration position as interest rates are expected to decline in the medium term. Global events remain likely to add volatility. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

## LIST OF PROSPECTIVE INVESTMENTS

The following are among the Fund's approved investment outlets, wherein the Trustee intends to invest depending on strategy, availability, or other market-driven circumstances:

- USD dollar deposit products;
- USD money market instruments;
- USD dollar denominated securities issued by or guaranteed by the Philippine government, or by the BSP;
- USD dollar tradable securities issued or guaranteed by multilateral institutions such as the Asian Development Bank (ADB), International Monetary Fund (IMF) and World Bank;
- USD dollar tradable securities issued by the government of a foreign country, any political subdivision of a foreign country or any supranational entity
- Exchange-listed securities;
- Marketable instruments that are traded in an organized exchange;
- Loans traded in an organized market; and
- Such other investments suitable to the nature, classification, and strategy of the Fund, as allowed by prevailing regulations.
