KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Equity Price Risk:

The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk:

Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk:

Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

BENCHMARK INFORMATION

Name: The PSEi Total Return Index (PSEi TRI)

Date of Change: January 2, 2025

Description and Reason for Change: The Philippine Stock Exchange Index or PSEi is the main index of the Philippine Stock Exchange. The PSEi is a free float-adjusted market capitalization-weighted index of the 30 largest and most active common stock. The PSEi Total Return Index (PSEi TRI) covers both price performance and income from dividend payments by reinvesting cash dividends back to the PSEi according to each constituent's respective market capitalization weightings. The change in the fund's benchmark from PSEi to PSEi TRI is mainly to satisfy the characteristics of a valid benchmark for a UITF in the BSP Circular No. 1178, and to conform with the Global Investment Performance Standards (GIPS) requirement for firms to select an appropriate total return benchmark when available.

Information about the benchmark may be accessed through Philippine Stock Exchange <https://www.pse.com.ph/>. Alternatively, participants may request information from BPI Wealth at bpiwealth.com.ph.

OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) snapped its three month winning streak as the index slipped by 0.2% to 6,341.53. The local bourse surged early on as global developments particularly on the ever-pressing US Tariff issues continued to move markets. US and China struck a temporary trade deal that covered a 90-day pause on tariffs and a decline in reciprocal tariffs by 115 percentage points. Moreover, US President Donald Trump postponed the 50% tariffs implementation on European Union imports. On the local scene, sentiment was supported by the strong Philippine peso after trading below the Php56 level. However, gains were capped at the latter part of the month on the back of slower-than-expected 1Q GDP for the Philippines at 5.4% compared to median estimate of 5.8%. The index was dragged even further following the MSCI rebalancing at month-end.

On trading activity, the PSEi recorded an Average Daily Turnover of Php6.35 billion or 9% higher on a month-on-month basis. In terms of foreign activity, foreigners remained net sellers at US\$259 million dragged by a US\$283 million block sale of RRHI shares. Excluding the transaction, foreigners would have been net buyers.

On a per stock basis, the top three index gainers for the month include: AGI (+36.27%), BLOOM (+22.58%) and ICT (+20.52%). Meanwhile, the bottom three performers were: CBC (-16.92%), GLO (-8.81%) and ALI (-8.18%).

Fund Performance. The fund returned -0.02% in May, below the benchmark by 33 basis points. Year-to-date, the Fund registered a gain of 0.92%, outperforming the benchmark by 185 basis points.

Fund Strategy. The Fund will be opportunistic on market dips as volatility from the global front remains given lingering uncertainties on US tariffs and escalating geopolitical tensions. The preference is for companies with leading market capitalization, good fundamentals and are high-dividend paying.
