KEY RISKS AND RISK MANAGEMENT

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Equity Price Risk: Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

⁴ BENCHMARK INFORMATION

Name	Description and Key Characteristics
PSEi Total Return Index (PSEi TRI)	The Philippine Stock Exchange Index or PSEi is the main index of the Philippine Stock Exchange. The PSEi is a free float-adjusted market capitalization-weighted index of the 30 largest and most active common stock. The PSEi Total Return Index (PSEi TRI) covers both price performance and income from dividend payments by reinvesting cash dividends back to the PSEi according to each constituent's respective market capitalization weightings.
BPI Philippine Government Bond 1-5 Year Index	The BPI Philippine Government Bond Index (the BPI Index) is sponsored by the Bank of the Philippine Islands (the Sponsor). The BPI Index is intended to reflect the performance of Philippine Government, fixed-rate straight bonds denominated in Philippine Peso. It is intended to be a template for passive, diversified fixed income investment portfolios where securities are held in proportion to the market value (Market Capitalization) of the issued securities. It aims to provide accurate and objective benchmarks by which to assess the performance of the Philippine Government bond market. The BPI Index comprises of the BPI Philippine Government Bond Index as the primary index and five other indices, each with constituents covering more specific asset segments.

Details about the equity benchmark component can be accessed through the Philippine Stock Exchange website at <https://www.pse.com.ph>. For information regarding the fixed income benchmark component, participants may contact the calculating agent, BPI Investments Inc, via email at bpi_investment@bpi.com.ph. Alternatively, inquiries may also be directed to BPI Wealth at bpiwealth@bpi.com.ph.

⁵ Effective January 2, 2025, the Fund's benchmark changed from 50% Philippine Stock Exchange Index (PSEi) + 50% return of the BPI Philippine Government Bond 1-5 Year Index, net of tax to 50% PSEi Total Return Index (PSEi TRI) + 50% return of the BPI Philippine Government Bond 1-5 Year Index, net of tax to ensure alignment with BSP Circular No. 1178, Guidelines on the Use of Benchmarks for UITFs.

OUTLOOK AND STRATEGY

Market Review. Philippine government bond prices declined in July as yields moved higher amid renewed geopolitical tensions in the Middle East. During the month, the Memorandum of Understanding between the United States and Iran unraveled, leading to renewed military strikes and disruptions to shipping activities in the Strait of Hormuz. As a result, oil prices surged from around \$70 per barrel to as high as \$100 during the month, reigniting global inflation concerns, particularly among oil-importing countries such as the Philippines. While domestic inflation eased from 6.8% in May to 6.4% in June, the inflationary implications of higher oil prices weighed more heavily on market sentiment. Against this backdrop, local bond yields rose by an average of 30 basis points during the month, with the 5-year benchmark government bond yield increasing from 6.75% to 7.33%. Investor sentiment remained cautious, as foreign investors recorded net outflows of Php10 billion in July, bringing cumulative year-to-date outflows to Php275 billion. Meanwhile, the Bureau of the Treasury raised Php135 billion through its regular bond auctions, falling short of its Php160 billion target. The shortfall came after the BTr fully rejected bids for a 7-year Treasury bond offering, as investors demanded significantly higher yields amid the uncertain market environment.

The Philippine Stock Exchange Index (PSEi) extended its gains during the period and briefly tested the 6,400 level, supported by renewed foreign buying and bargain-hunting activity in heavily sold-down stocks. Investor sentiment also improved amid signs of easing macroeconomic pressures, with July inflation moderating to 6.4% from 6.8% in the previous month. However, gains were partially capped toward the end of the period due to profit-taking activities and increased trading volumes related to the PSE index rebalancing. The rebalancing saw Maynilad Water Services Inc. (MYNLD) included in the index in place of Converge ICT Solutions Inc. (CNVRG). As a result, the index retreated below the 6,300 level, with the PSEi ending the month at 6,236.44, up 3.3%. Market activity remained relatively subdued, with average daily value turnover reaching Php5.45 billion, representing a 19.5% decline from the previous month. Foreign investors, meanwhile, turned net buyers for the first time since the onset of the US-Iran conflict, recording net foreign inflows of US\$67 million during the period. On a stock-specific basis, top gainers for the month include: AC (+22.37%), ALI (+14.19%), JFC (+10.63%). Meanwhile top laggards are as follows : PLUS (-16.24%), JGS: (-16.04%), MER (-15.79%).

Fund Performance. The fund returned 1.04% in July, underperforming the benchmark by 38 basis points. Year-to-date, the Fund registered a gain of 1.88%, underperforming the benchmark by 131 basis points.

Fund Strategy. The Fund will remain defensive given the macroeconomic headwinds and uncertainties globally brought about by geopolitical tensions. The Fund's preference is for companies with leading market capitalization, clear earnings growth drivers, dividend-paying and high-yielding. For the fixed income portion of the fund, the Fund looks to maintain a nimble portfolio position to take advantage of any opportunities as interest rates are expected to trend higher over the coming months. Local inflation has exceeded the BSP's target since March and may remain elevated due to higher oil prices and their indirect impact on other goods and services. This environment may prompt further policy rate hikes from the BSP.

Market volatility may persist in the near term, driven largely by global developments, and the Fund will be actively managed to navigate these conditions. Investors should note that bond funds may experience short-term price fluctuations, and returns are generally realized over a medium- to long-term investment horizon.
