KEY RISKS AND RISK MANAGEMENT

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/ events and/or negative developments in domestic political and economic conditions.

Equity Price Risk: Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/sellers in the market, low trading volumes or market disruptions, among other reasons/factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

⁴ BENCHMARK INFORMATION

Name	Description and Key Characteristics
BPI Philippine Government Bond 1-3 Year Index	The BPI Philippine Government Bond Index (the BPI Index) is sponsored by the Bank of the Philippine Islands (the Sponsor). The BPI Index is intended to reflect the performance of Philippine Government, fixed-rate straight bonds denominated in Philippine Peso. It is intended to be a template for passive, diversified fixed income investment portfolios where securities are held in proportion to the market value (Market Capitalization) of the issued securities. It aims to provide accurate and objective benchmarks by which to assess the performance of the Philippine Government bond market. The BPI Index comprises of the BPI Philippine Government Bond Index as the primary index and five other indices, each with constituents covering more specific asset segments.
PSEi Total Return Index (PSEi TRI)	The Philippine Stock Exchange Index or PSEi is the main index of the Philippine Stock Exchange. The PSEi is a free float-adjusted market capitalization-weighted index of the 30 largest and most active common stock. The PSEi Total Return Index (PSEi TRI) covers both price performance and income from dividend payments by reinvesting cash dividends back to the PSEi according to each constituent's respective market capitalization weightings.

Details about the equity benchmark component can be accessed through the Philippine Stock Exchange website at <https://www.pse.com.ph>. For information regarding the fixed income benchmark component, participants may contact the calculating agent, BPI Investments Inc, via email at bpi_investment@bpi.com.ph. Alternatively, inquiries may also be directed to BPI Wealth at bpiwealth@bpi.com.ph.

⁵ Effective January 2, 2025, the Fund's benchmark changed from 90% BPI Philippine Government Bond 1-3 Year Index and 10% Philippine Stock Exchange Index (PSEi) to 90% BPI Philippine Government Bond 1-3 Year Index and 10% PSEi Total Return Index (PSEi TRI) to ensure alignment with BSP Circular No. 1178, Guidelines on the Use of Benchmarks for UITFs.

OUTLOOK AND STRATEGY

Market Review. Philippine government bond prices declined in May as yields rose sharply following a significant upside surprise in inflation. Headline inflation accelerated from 4.1% in March to 7.2% in April, well above market expectations of 5.5%. The increase was largely driven by higher fuel prices, elevated electricity rates, and faster rice inflation, indicating a broadening of price pressures. Bond yields increased by an average of 61 basis points during the month. The 5-year benchmark yield rose from 6.87% to a high of 7.48% before closing at 7.34%. Investor sentiment remained cautious, with foreign investors posting net outflows of Php12 billion, bringing year-to-date outflows to Php251 billion. Towards the latter part of the month, sentiment slightly improved amid positive developments in US-Iran negotiations, which helped ease concerns over global oil prices. Oil prices declined to below \$100 per barrel, providing some relief to inflation expectations. During the month, the Bureau of the Treasury raised Php89 billion through its regular bond auctions, below its Php140 billion target, as the government opted to accept fewer bids in light of rising yields.

The Philippine Stock Exchange Index (PSEi) declined for a third consecutive month, reflecting mounting macroeconomic pressures stemming from geopolitical tensions in the Middle East. Escalating conflict involving the United States, Israel, and Iran has driven global oil prices higher, which in turn has begun to weigh on domestic economic indicators. Inflation accelerated sharply in April, with headline CPI rising to 7.2% year-on-year, driven primarily by elevated fuel costs—gasoline surged by 59.6% and diesel by 122.7%. This inflationary spike has reinforced expectations that the Bangko Sentral ng Pilipinas (BSP) will continue its monetary tightening cycle to contain price pressures. Economic growth also showed signs of weakness with 1Q2026 GDP expanding by just 2.8%, marking the slowest pace since the pandemic and intensifying concerns around stagflation—a combination of slowing growth and high inflation. Meanwhile, the Philippine peso depreciated further, reaching a record low of ₱61.567 per US dollar, adding to inflationary risks. Market sentiment was further dampened by the MSCI index rebalancing, which saw Jollibee Foods Corporation (JFC) downgraded from the Standard Index to the Small Cap Index. This triggered significant foreign selling toward month-end, amplifying downward pressure on the broader market. As a result, the PSEi closed the month down 1.1% at 5,768.76. Despite the decline in index performance, market activity improved, with average daily value turnover increasing by 3.22% to Php6.25 billion, largely driven by MSCI-related flows. However, foreign investors remained net sellers, recording US\$149 million in net outflows for May. On a stock-specific basis, top gainers for the month include: ACEN (+16.20%), AEV (+9.28%), ICT (+5.99%). Meanwhile top laggards are as follows : PLUS (-22.68%), JFC (-20.19%), CNVRG (-13.39%)

Fund Performance. The fund returned -0.57% in May, above the benchmark by 12 basis points. Year-to-date, the Fund registered a loss of -0.36%, below the benchmark by 17 basis points.

Fund Strategy. The Fund will remain defensive given heightened volatility from geopolitical tensions. The Fund's preference is for companies with leading market capitalization, clear earnings growth drivers, dividend-paying and high-yielding. For the fixed income portion of the fund, the Fund looks to maintain a nimble portfolio position to take advantage of any opportunities as interest rates are expected to trend higher over the coming months. Local inflation has exceeded the BSP's target in March and may remain elevated due to higher oil prices and their indirect impact on other goods and services. This environment may prompt further policy rate hikes from the BSP.

Market volatility may persist in the near term, driven largely by global developments, and the Fund will be actively managed to navigate these conditions. Investors should note that bond funds may experience short-term price fluctuations, and returns are generally realized over a medium- to long-term investment horizon.

LIST OF PROSPECTIVE INVESTMENTS
