The Index intends to reflect the performance of Philippine Corporate issued fixed-rate bonds denominated in Philippine Peso. It is intended to be a template for passive, diversified fixed income investment portfolios where securities are held in proportion to the market value (Market Capitalization) of the issued securities. It aims to provide accurate and objective benchmarks by which to assess the performance of the Philippine Corporate bond market.

Relation to the Fund's Objective or Investment Strategy: The Fund is actively managed, which allows the Trustee full discretion on security selection. The Trustee will use the BPI Philippine Corporate Bond Index as reference during portfolio construction to ensure that the active risk taken is commensurate to the Fund's objective and investor profile. OUTLOOK AND STRATEGY

Market Review. Philippine government bond yields declined by an average of 13 basis points in February, led by bonds with maturities of less than one year, which fell by around 25 basis points. The rally in bonds was largely driven by the Bangko Sentral ng Pilipinas' (BSP) decision to cut its policy rate from 4.50% to 4.25%, citing softer-than-expected economic growth.

Investor sentiment was further supported by news reports on the potential inclusion of Philippine government bonds in the J.P. Morgan Government Bond Index – Emerging Markets (GBI-EM). National Treasurer Sharon Almanza indicated that an announcement on the country's possible inclusion could be forthcoming. Such inclusion may increase foreign investor participation in the local bond market, potentially boosting demand for government securities and exerting downward pressure on yields.

During the month, the Bureau of the Treasury (BTr) issued a new 10-year benchmark bond (FXTN 10-74), raising a total of Php298 billion, including Php63 billion from bond exchange transactions. The auction attracted strong demand, with total tenders reaching Php328.5 billion, significantly exceeding the initial offer of Php30 billion. The bond was awarded at a coupon rate of 5.925%, which was below prevailing secondary market yields for comparable tenors. The strong auction outcome reinforced positive sentiment in the local fixed income market during the period.

Fund Performance. The Fund returned 0.79% for the month, outperforming the benchmark by 46 bps in February.

Fund Strategy. The Fund will continue to invest in a diversified mix of securities primarily issued by Philippine corporations.
