OUTLOOK AND STRATEGY

Market Review. Philippine government bond yields declined by an average of 12 basis points in January, largely driven by softer-than-expected economic data. PH GDP grew 3.0% year-on-year in 4Q2025, bringing the full-year growth to 4.4%, below the government's target range. The weaker print fueled expectations that the Bangko Sentral ng Pilipinas (BSP) may cut policy rates in February to help support growth. At the same time, December inflation was at 1.8%, below the BSP's 2–4% target range. This further reinforces the view that the central bank has room to cut rates.

Despite the downtrend in yields, the month saw periods of heightened volatility due to global geopolitical developments, especially concerning the US, Greenland, and some European countries. Market sentiment was affected by concerns linked to global trade tensions and geopolitical risks, though these eased after statements indicating no escalation. A weaker peso, which touched new record lows against the US dollar, also weighed on overall sentiment and contributed to net foreign outflows of around Php88 billion in January.

The Bureau of the Treasury conducted four treasury bond auctions in January. Demand remained strong, with several auctions reaching up to three times oversubscription, reflecting robust domestic liquidity and continued investor interest in government securities.

Fund Performance. The Fund returned 0.00% for the month, underperforming the benchmark by 86 bps in December.

Fund Strategy. The Fund will continue to invest in a diversified mix of securities primarily issued by Philippine corporations.
