### <sup>4</sup>BENCHMARK INFORMATION

**Description and Key Characteristics:** Treasury Bills are zero coupon peso-denominated short-term fixed income securities issued by the Republic of the Philippines through its Bureau of Treasury.

**Relation to the Fund's Objective or Investment Strategy:** The Fund is actively managed, allowing the Trustee full discretion on security selection. Given the Fund's primary objective of capital preservation for investors with a short-term horizon, the 91-day Treasury Bill, a liquid security that is representative of attainable short-term placements, is an appropriate benchmark. Investors may use the benchmark to gauge the Fund's performance.

Information about the benchmark may be accessed through Philippine Depository & Trust Corp. <https://www.pds.com.ph/>. Alternatively, participants may request information from BPI Wealth at [bpiwealth@bpi.com.ph](mailto:bpiwealth@bpi.com.ph).

## OUTLOOK AND STRATEGY

**Market Review.** The BPI Money Market Index gained 0.44% in January as yields on the short end of the curve declined by 17 basis points on average. Government bonds posted a strong start to the year following news that the country's economy had expanded slower than anticipated for the final quarter of 2025. Philippine GDP growth came in at 3%[JT1.1] year-on-year in 4Q2025, bringing the country's full-year average growth to 4.4%, behind the government's target range. This brought about speculation that the Bangko Sentral ng Pilipinas could cut rates sooner rather than later to boost the economy.

During the month, the Bureau of the Treasury (BTr) held three Treasury Bill auctions. Demand was strong across the 91- 182- and 364-day tenors, with the BTr awarding some issuances at larger volumes than was initially offered. Average yields settled at 4.666% for the 91-day, 4.751% for the 182-day, and 4.827% for the 364-day tenors on the last auction held January 26th. These levels reflect year-to-date declines from starting yields of 4.755%, 4.895%, and 4.937%, respectively.

The volume of BSP bills (28-day tenor) issuances declined from Php100 billion at the beginning of the year to just Php80 billion on the final auction held January 30. The average yield came in at 4.70%, representing a 15-bp decline from the start-of-year level of 4.85%. The sharp decline in BSP bill yields and the reduced supply of short-term instruments continued to contribute to a downward adjustment in time deposit rates across the banking system.

**Fund Performance.** The Fund returned 0.00% during the month of January, underperforming the benchmark by 41 basis points.

**Fund Strategy.** The Fund favors the safety of shorter-dated securities and time deposits. Expectations of interest rates staying elevated may help maintain current portfolio yield.
