## OUTLOOK AND STRATEGY

**Market Review.** Philippine government bond prices initially recovered in April following the sharp selloff in March. However, gains were later reversed, with yields ending the month broadly unchanged.

The early decline in yields was driven by improving global sentiment, particularly after reports of a ceasefire between the US and Iran, which led to a sharp drop in oil prices. Brent crude fell from around \$118 per barrel to as low as \$90. However, this improvement proved temporary as negotiations stalled, causing oil prices to rebound and weigh on market sentiment.

Locally, bond yields were pressured higher following further monetary tightening by the Bangko Sentral ng Pilipinas (BSP). The policy rate was raised from 4.25% to 4.50%, alongside upward revisions to inflation forecasts. The BSP also signaled the possibility of additional rate hikes, contributing to the bond selloff late in the month.

During the period, the Bureau of the Treasury raised PHP 115 billion through regular bond auctions, below its PHP 120–140 billion target. This was due to the government choosing to accept fewer bids as bond yields continued to rise.

**Fund Performance.** The Fund returned -0.05% for the month, 36 basis points below its benchmark.

**Fund Strategy.** The Fund looks to maintain a nimble portfolio position to take advantage of any opportunities as interest rates are expected to trend higher over the coming months. Local inflation has exceeded the BSP's target in March and may remain elevated due to higher oil prices and their indirect impact on other goods and services. This environment may prompt further policy rate hikes from the BSP.

Market volatility may persist in the near term, driven largely by global developments, and the Fund will be actively managed to navigate these conditions. Investors should note that bond funds may experience short-term price fluctuations, and returns are generally realized over a medium- to long-term investment horizon.
