**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

**Market/Price Risk:** Investors are exposed to adverse changes in the prices of foreign currency denominated fixed income instruments of the target funds due to a rise in interest rates as a result of adverse market conditions, unfavorable developments in the political and economic conditions of countries where the underlying securities of the target funds are issued or traded, or other issuer-specific factors.

**Liquidity Risk:** Investors are exposed to the risk of loss due to the inability of the target funds to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited participants in the market, low trading volumes, market disruptions, among others.

**Interest Rate Risk:** Investors are exposed to adverse changes in the prices of fixed income securities of the target funds due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/events and/or negative developments in political and economic conditions.

**Credit/ Default Risk:** Investors are exposed to the risk of loss due to the failure of the borrower/debt issuer to make timely interest and/or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in political and economic conditions.

**FX Risk:** Investors are exposed to the risk of loss from a decline in the market value of the target fund when the underlying securities of the target funds are translated to USD.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

## BENCHMARK INFORMATION <sup>5</sup>

Name	Description and Key Characteristics
<b>MSCI All Country World Index Net Total Return USD Index</b>	The MSCI ACWI Index, MSCI's flagship global equity index, is designed to represent performance for the full opportunity set of large- and mid-cap stocks across 23 developed and 24 Emerging Markets. With 2,757 constituents, the index covers approximately 85% of the global investable equity opportunity set. The index is based on the MSCI Global Investable Market Indexes (GIMI) Methodology – a comprehensive and consistent approach to index construction that allows for meaningful global views and cross regional comparisons across all market capitalization size, sector and style segments and combinations. This methodology aims to provide exhaustive coverage of the relevant investment opportunity set with a strong emphasis on index liquidity, investability and replicability. The MSCI Total Return Indices measure the market performance, including price performance and income from regular cash distributions (cash dividend payments or capital repayments). MSCI's Daily Total Return (DTR) methodology reinvests regular cash distributions in indices on the ex-date of such distributions.
<b>Bloomberg Barclays Global Aggregate Bond Index (Unhedged)</b>	The Bloomberg Global Aggregate Index is a flagship measure of global investment grade debt from twenty-eight local currency markets. This multi-currency benchmark includes treasury, government-related, corporate and securitized fixed-rate bonds from both developed and emerging markets issuers. A component of the Multiverse Index, the Global Aggregate Index was created in 2000, with index history backfilled to January 1, 1990.

More details about the benchmark may be accessed through Bloomberg and the website of MSCI. Alternatively, participants may request information from BPI Wealth at [bpwealth@bpi.com.ph](mailto:bpwealth@bpi.com.ph).

## OUTLOOK AND STRATEGY

**Market Review.** Global bonds posted modest gains in February, with the Bloomberg Global Aggregate Bond Index (Unhedged USD) returning 1.12%. Market sentiment was defined by a broad flight to safety following joint U.S. and Israeli military action against Iran late in the month. This risk-off environment funnelled capital into sovereign debt, driving yields lower across major developed markets. Consequently, the U.S. Treasury curve flattened significantly, with the 10-year/2-year yield spread narrowing from 74 bps at the start of the month to 59 bps by month-end. Credit markets remained broadly resilient despite this volatility. Investment Grade (IG) bonds generated positive total returns, even as spreads widened slightly amid the surge in demand for safe-haven assets. High Yield (HY) debt also delivered modest positive returns, though performance softened compared to January as risk appetite deteriorated in the final week. Markets remained caught between falling government bond yields, which supported carry, and widening credit spreads driven by AI-related sector concerns and heightened Middle Eastern geopolitical risk. Investor sentiment toward Emerging Market (EM) debt turned cautious as global shocks slowed portfolio inflows. Nevertheless, the asset class delivered modest positive returns, supported by high carry and resilient macro fundamentals. While escalating U.S.–Iran tensions triggered a late-month widening of EM hard-currency spreads, particularly for energy-importing sovereigns, the move remained contained and largely technical. Regionally, performance was varied: Latin America benefited from high carry and commodity exposure; Asia remained stable due to stronger growth and policy continuity; while EMEA showed the highest dispersion and sensitivity to the developing situation in the Middle East. Across the global equity space, Global equities were mixed in February. The MSCI ACWI rose by just under 1% while the Nasdaq 100 fell -3.9% and the S&P 500 dipped by -1.4%. The relatively muted range of the S&P 500 for most of the month gave way to heightened volatility as the month closed following a breakout of tensions in the Middle East. February closed with mixed sector dynamics. Utilities led sector returns with a 10.4% monthly gain followed by Energy up 9.5% and Materials up 8.4%. As risk premia rose, Consumer Staples fared well too, rising 7.8% for the month and Health Care followed suit, up 3.5%. The worst performing sector was Financials, which tumbled -3.8% and Technology also struggled, down -3.6% for the month. The U.S.–Iran conflict muddled the Federal Reserve's interest-rate path, with rising oil prices and inflation uncertainty prompting policymakers to reconsider the pace and direction of future rate moves. Some officials suggest that rate cuts may be delayed or even reversed if inflationary pressures persist. Corporate earnings growth remains uneven in early 2026, with technology and communication services continuing to drive a disproportionate share of overall gains, while many smaller companies are exhibiting more modest momentum. That said, broader forecasts still indicate positive earnings growth across all sectors for the full year. In February, the EURO STOXX 50 index reached a 52-week high of 6,173 near the end of the month. After a strong February, concerns in the Middle East also weighed on European share price by month-end. Asia-Pacific equities generally rose throughout February, extending a strong start to the year driven by sustained investor appetite, particularly in technology, semiconductors, and AI-linked stocks. The Nikkei 225 trended higher most of the month, hitting multi-year record levels while South Korea's KOSPI had an extremely strong February, breaking above 6,000.

## **OUTLOOK AND STRATEGY**

**Fund Performance.** The fund returned 1.90%, outperforming the benchmark by 73 basis points. Security selection within the fund helped performance.

**Fund Strategy.** The Fund looks to maintain a nimble portfolio position to take advantage of any opportunities as global inflation is seen to increase over the next few months as an effect of the ongoing geopolitical tensions in the Middle East. Volatility may persist in the near term driven by global factors, and the portfolio will be actively managed to take advantage of this. Investors in the bond fund must be prepared to withstand volatility as higher investment value is normally achieved over the medium to long term horizon.

## **LIST OF PROSPECTIVE INVESTMENTS**
