KEY RISKS AND RISK MANAGEMENT

Interest Rate Risk: The fund invests in short term domestic fixed income securities, exposing investors to the risk of loss arising from rise in interest rates, which generally causes fixed income security prices to decline. Factors/events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/events and/or negative developments in domestic political and economic conditions.

Equity Price Risk: Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/sellers in the market, low trading volumes or market disruptions, among other reasons/ factors

FEES

Trustee Fees	Monthly rate: 0.1223% ¹ Annual fee: 1.50% p.a.	BPI Wealth

⁴ BENCHMARK INFORMATION

Name	Description and Key Characteristics
PSEi Total Return Index (PSEi TRI)	The Philippine Stock Exchange Index or PSEi is the main index of the Philippine Stock Exchange. The PSEi is a free float-adjusted market capitalization-weighted index of the 30 largest and most active common stock. The PSEi Total Return Index (PSEi TRI) covers both price performance and income from dividend payments by reinvesting cash dividends back to the PSEi according to each constituent's respective market capitalization weightings.
BPI Philippine Government Bond Index	The BPI Philippine Government Bond Index (the BPI Index) is sponsored by the Bank of the Philippine Islands (the Sponsor). The Sponsor is responsible for the design of the BPI Index and the issuance of these Rules. The BPI Index is intended to reflect the performance of Philippine Government, fixed-rate straight bonds denominated in Philippine Peso. It is intended to be a template for passive, diversified fixed income investment portfolios where securities are held in proportion to the market value (Market Capitalization) of the issued securities. It aims to provide accurate and objective benchmarks by which to assess the performance of the Philippine Government bond market.

Details about the equity benchmark component can be accessed through the Philippine Stock Exchange website at <https://www.pse.com.ph>. For information regarding the fixed income benchmark component, participants may contact the calculating agent, BPI Investments Inc, via email at bpi_investment@bpi.com.ph. Alternatively, inquiries may also be directed to BPI Wealth at bpiwealth@bpi.com.ph.

⁵ Effective January 2, 2025, the Fund's benchmark changed from 30% Philippine Stock Exchange Index (PSEi) + 70% BPI Philippine Government Bond Index to 30% PSEi Total Return Index (PSEi TRI) + 70% BPI Philippine Government Bond Index to ensure alignment with BSP Circular No. 1178, Guidelines on the Use of Benchmarks for UITFs.

Investments in the said outlets were approved by the BPI Wealth's Board of Directors. Likewise, all related party transactions are conducted on an arm's length and best execution basis and within established limits.

**Related party in accordance with BPI Wealth's internal policy*

OUTLOOK AND STRATEGY

Market Review. Philippine government bond prices initially recovered in April following the sharp selloff in March. However, gains were later reversed, with yields ending the month broadly unchanged. The early decline in yields was driven by improving global sentiment, particularly after reports of a ceasefire between the US and Iran, which led to a sharp drop in oil prices. Brent crude fell from around \$118 per barrel to as low as \$90. However, this improvement proved temporary as negotiations stalled, causing oil prices to rebound and weigh on market sentiment. Locally, bond yields were pressured higher following further monetary tightening by the Bangko Sentral ng Pilipinas (BSP). The policy rate was raised from 4.25% to 4.50%.

The Philippine Stock Exchange Index (PSEi) declined for a second consecutive month as continued Middle East tensions—particularly the conflict involving the US and Israel against Iran—persisted in weighing on investor sentiment. The prolonged conflict continued to have spillover effects on the global economy, most notably through elevated oil prices. On the domestic front, March inflation accelerated to 4.1%, breaching the Bangko Sentral ng Pilipinas' (BSP) 2–4% target range and prompting a swift policy response. The BSP raised policy rates by 25 basis points and upgraded its inflation forecasts for 2026. Meanwhile, the Philippine peso came under renewed pressure, breaching the ₱61-per-dollar level during the month. Against this backdrop, the PSEi ended April at 5,833.64, representing a 1.9% month-on-month decline. Market activity remained subdued, with Average Daily Value Turnover declining to Php6.055 billion, down 6.52% from the previous month. Foreign investors likewise remained net sellers, registering US\$211 million in net outflows for the month, further dampening market sentiment. On a per stock basis, the top three index gainers for the month include: MER (+5.59%), MBT (+5.51%) and PGOLD (+4.63%). Meanwhile, the bottom three performers were: CNPF (-18.57%), PLUS (-15.02%) and JFC (-10.52%).

Fund Performance. The Fund returned -0.49% in April, underperforming the benchmark by 26 basis points. Year-to-date, the Fund registered a loss of -3.12%, underperforming the benchmark by 161 basis points.

Fund Strategy. The Fund will continue to be defensive given heightened volatility from geopolitical tensions. The Fund's preference is for companies with leading market capitalization, clear earnings growth drivers, dividend-paying and high-yielding. For the fixed income portion of the fund, the Fund looks to maintain a nimble portfolio position to take advantage of any opportunities as interest rates are expected to trend higher over the coming months. Local inflation has exceeded the BSP's target in March and may remain elevated due to higher oil prices and their indirect impact on other goods and services. This environment may prompt further policy rate hikes from the BSP. Market volatility may persist in the near term, driven largely by global developments, and the Fund will be actively managed to navigate these conditions. Investors should note that bond funds may experience short-term price fluctuations, and returns are generally realized over a medium- to long-term investment horizon, alongside upward revisions to inflation forecasts. The BSP also signaled the possibility of additional rate hikes, contributing to the bond selloff late in the month. During the period, the Bureau of the Treasury raised PHP 115 billion through regular bond auctions, below its PHP 120–140 billion target. This was due to the government choosing to accept fewer bids as bond yields continued to rise.

LIST OF PROSPECTIVE INVESTMENTS

The following are among the Fund's approved investment outlets, wherein the Trustee intends to invest depending on strategy, availability, or other market-driven circumstances:

- a) Deposit products;
- b) Money market instruments;
- c) Securities issued by or guaranteed by the Philippine government, or by the BSP;
- d) Tradable securities issued or guaranteed by multilateral institutions such as the Asian Development Bank (ADB), International Monetary Fund (IMF) and World Bank;
- e) Common shares, preferred shares, and convertible preferred share listed on the Philippine Stock Exchange
