[2] Monthly Rate: Billings received for August 2026 divided by the average daily NAV for the same month valued at Php 575.87 Mn
[3] Billing is received at the last quarter of the year

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if it is suited to his/her investment objective and risk tolerance before deciding to invest. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from our website.

This Fund is for investors who:

- Are at least classified as aggressive based on their risk profile
- Have an investment horizon of at least five (5) years

KEY RISKS AND RISK MANAGEMENT

Interest Rate Risk: The fund invests in short term domestic fixed income securities, exposing investors to the risk of loss arising from arise in interest rates, which generally causes fixed income security prices to decline. Factors/events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/events and/or negative developments in domestic political and economic conditions.

Equity Price Risk: Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/sellers in the market, low trading volumes or market disruptions, among other reasons/ factors

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

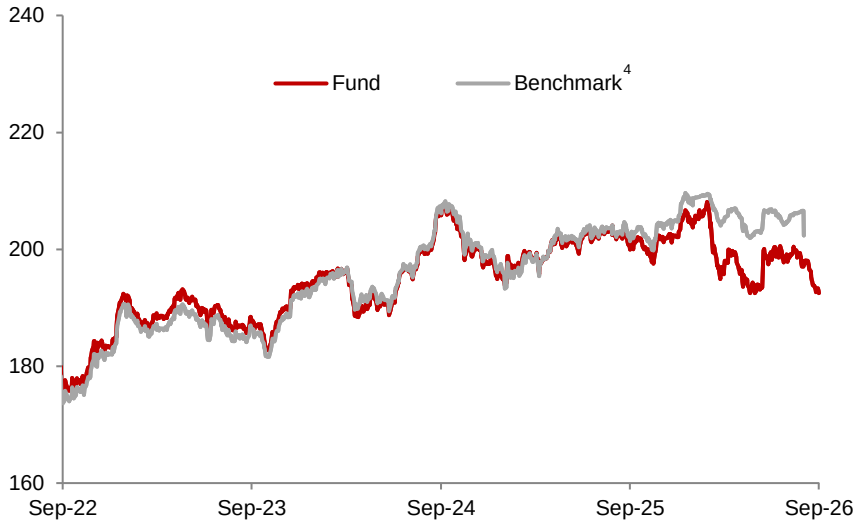

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

[4] BENCHMARK INFORMATION

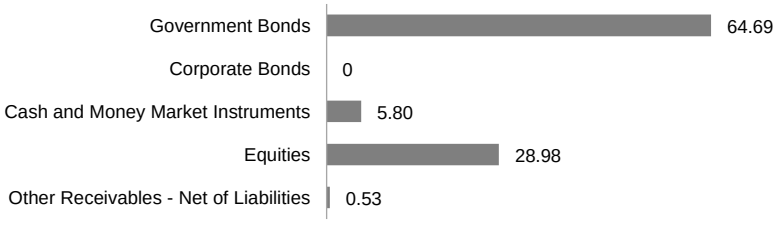

Name	Description and Key Characteristics
PSEi Total Return Index (PSEi TRI)	The Philippine Stock Exchange Index or PSEi is the main index of the Philippine Stock Exchange. The PSEi is a free float-adjusted market capitalization-weighted index of the 30 largest and most active common stock. The PSEi Total Return Index (PSEi TRI) covers both price performance and income from dividend payments by reinvesting cash dividends back to the PSEi according to each constituent's respective market capitalization weightings.
BPI Philippine Government Bond Index	The BPI Philippine Government Bond Index (the BPI Index) is sponsored by the Bank of the Philippine Islands (the Sponsor). The Sponsor is responsible for the design of the BPI Index and the issuance of these Rules. The BPI Index is intended to reflect the performance of Philippine Government, fixed-rate straight bonds denominated in Philippine Peso. It is intended to be a template for passive, diversified fixed income investment portfolios where securities are held in proportion to the market value (Market Capitalization) of the issued securities. It aims to provide accurate and objective benchmarks by which to assess the performance of the Philippine Government bond market.

Details about the equity benchmark component can be accessed through the Philippine Stock Exchange website at https://www.pse.com.ph. For information regarding the fixed income benchmark component, participants may contact the calculating agent, BPI Investments Inc, via email at bpi_investment@bpi.com.ph. Alternatively, inquiries may also be directed to BPI Wealth at bpiwealth@bpi.com.ph.

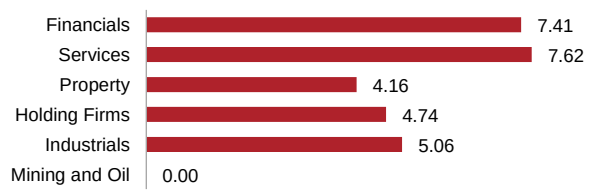

[5] Effective January 2, 2025, the Fund's benchmark changed from *30% Philippine Stock Exchange Index (PSEi) + 70% BPI Philippine Government Bond Index* to *30% PSEi Total Return Index (PSEi TRI) + 70% BPI Philippine Government Bond Index* to ensure alignment with BSP Circular No. 1178, Guidelines on the Use of Benchmarks for UITFs.

OUTLOOK AND STRATEGY

Market Review. Philippine government bond prices declined in September as yields moved higher amid renewed inflation concerns. Global oil prices surged during the month, with Brent crude rising from around $90 per barrel to above $100 per barrel as tensions in the Middle East escalated and hopes for a near-term resolution diminished. Reflecting the impact of higher fuel costs, the Bangko Sentral ng Pilipinas (BSP) projected September inflation to settle between 6.4% and 7.4%, above the 6.1% recorded in August. September inflation was subsequently reported at 7.2%.

Against this backdrop, local government bond yields increased by an average of 33 basis points across the curve. The benchmark 5-year government bond yield rose from 7.07% to 7.41% during the month. Market sentiment remained cautious, weighed down by persistent inflation pressures, rising global bond yields, and continued foreign fund outflows. Foreign investors posted net outflows of Php21 billion in September, bringing year-to-date outflows to Php328 billion.

The Bureau of the Treasury (BTr) raised Php86 billion through its regular bond auctions, although several offerings were only partially awarded as investors demanded higher yields. Auction demand remained generally subdued amid inflation concerns. Nevertheless, the government successfully launched a new 2.5-year Retail Treasury Bond (RTB) carrying a 6.875% coupon rate, which attracted strong investor interest during the offer period.

September proved extra challenging for Philippine equities, with the Philippine Stock Exchange Index (PSEi) declining 4.65% month-on-month to close at 5,679.48. The index started the month on a positive note but succumbed to worsening macroeconomic conditions as the period progressed.

Geopolitical tensions in the Middle East continued to drive oil prices higher, with Brent crude reaching as much as US$109 per barrel during the month. At the same time, elevated global interest rates weighed on equity markets, as the 10-year U.S. Treasury yield climbed above 5.2%. Domestically, inflation remained elevated, although it eased slightly to 6.1% year-on-year in August from 6.2% in July. The Philippine peso also weakened significantly, touching a record low of Php62.865 against the U.S. dollar.

Investor sentiment was further dampened by downward revisions to the country's economic growth outlook. S&P Global Ratings lowered its 2026 Philippine GDP growth forecast to 2.9% from 4.1%, while the Asian Development Bank reduced its projection to 3.3% from 3.8%.

Despite the market decline, trading activity improved during the month. Average daily value turnover rose 12.39% month-on-month to Php6.695 billion. Foreign investors, however, remained net sellers, recording net outflows of approximately US$131 million.

On a stock-specific basis, the month's top gainers were AEV (+2.43%), EMI (+1.17%), and AREIT (+1.09%). Conversely, the biggest laggards were PLUS (-23.92%), SCC (-20.35%), and RCR (-14.23%).

Fund Performance. The Fund returned -2.31% in September, underperforming the benchmark by 51 basis points. Year-to-date, the Fund declined by -4.75%, underperforming the benchmark by 304 basis points.

Fund Strategy. The Fund will remain defensive given the local and global macroeconomic headwinds. The Fund's preference is for companies with leading market capitalization, clear earnings growth drivers, dividend-paying and high-yielding.. For the fixed income portion, The Fund remains positioned to navigate changing market conditions and capture opportunities in the domestic fixed-income market. In August, moderating inflation and softer-than-expected economic growth supported demand for local government securities and helped temper concerns of further aggressive monetary tightening. Consequently, yields from the 2-year to 20-year tenors declined by an average of 28 bps during the month, resulting in higher bond prices.

Domestic and global uncertainties are expected to continue influencing the interest rate environment, particularly amid persistent inflation risks and continued monetary policy tightening. The Fund will remain actively managed, with portfolio positioning adjusted as market conditions evolve and investment opportunities arise. Investors should note that bond funds may experience short-term price volatility, with returns generally realized over a medium- to long-term investment horizon

LIST OF PROSPECTIVE INVESTMENTS

The following are among the Fund's approved investment outlets, wherein the Trustee intends to invest depending on strategy, availability, or other market-driven circumstances:

a) Deposit products;
b) Money market instruments;
c) Securities issued by or guaranteed by the Philippine government, or by the BSP;
d) Tradable securities issued or guaranteed by multilateral institutions such as the Asian Development Bank (ADB), International Monetary Fund (IMF) and World Bank;
e) Common shares, preferred shares, and convertible preferred share listed on the Philippine Stock Exchange
