**KEY RISKS AND RISK MANAGEMENT**

**Interest Rate Risk:** The fund invests in a medium-term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/events and/ or negative developments in domestic political and economic conditions.

**Liquidity Risk:** Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

**Credit/Default Risk:** Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

**Related Party Risk:** Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

### <sup>4</sup>BENCHMARK INFORMATION

**Name:** BPI Philippine Government Bond Index

**Description and Key Characteristics:** The BPI Index is intended to reflect the performance of Philippine Government, fixed-rate straight bonds denominated in Philippine Peso. It is intended to be a template for passive, diversified fixed income investment portfolios where securities are held in proportion to the market value (Market Capitalization) of the issued securities. It aims to provide accurate and objective benchmarks by which to assess the performance of the Philippine Government bond market.

The BPI Index comprises of the BPI Philippine Government Bond Index as the primary index and five other indices, each with constituents covering more specific asset segments.

**Relation to the Fund's Objective or Investment Strategy:** The Fund is actively managed, which allows the Trustee full discretion on security selection. The Trustee will use the BPI Philippine Government Bond Index as reference during portfolio construction to ensure that the active risk taken is commensurate to the Fund's objective and investor profile. Moreover, given the active nature of the Fund, the Trustee may select securities which are not within the benchmark index to take advantage of any opportunities available. Investors may use the Index to gauge the Fund's performance.

## OUTLOOK AND STRATEGY

**Market Review.** Philippine government bond prices declined in March as yields in the market moved higher. On average, bond yields increased by about 81 basis points, with bonds maturing in 3 to 10 years seeing the largest increases.

The rise in yields was mainly driven by concerns about higher inflation following a sharp increase in global oil prices. Locally, fuel prices went up significantly during the month, with gasoline prices rising from Php53 to Php93 per liter and diesel prices from Php61 to Php119. Near the end of March, the Bangko Sentral ng Pilipinas held an unscheduled meeting and decided to keep policy interest rates unchanged, citing concerns about economic growth despite inflation risks.

Investor sentiment was further affected by the weakening of the Philippine peso against the US dollar, which moved from Php57.67 to Php60.75 during the month. As a result, foreign investors continued to reduce their holdings of Philippine government bonds, with net outflows amounting to Php81.9 billion in March.

During the month, the Bureau of the Treasury raised Php55.2 billion through its regular bond auctions, which was below its Php108 billion target. This was due to the government choosing to accept fewer bids as bond yields continued to rise.

**Fund Performance.** The Fund returned -3.25% for the month, below its benchmark by 15 basis points.

**Fund Strategy.** The Fund looks to maintain a nimble portfolio position to take advantage of any opportunities as interest rates are expected to trend higher over the coming months. Local inflation has exceeded the BSP's target in March and may remain elevated due to higher oil prices and their indirect impact on other goods and services. This environment may prompt further policy rate hikes from the BSP.

Market volatility may persist in the near term, driven largely by global developments, and the Fund will be actively managed to navigate these conditions. Investors should note that bond funds may experience short-term price fluctuations, and returns are generally realized over a medium- to long-term investment horizon.
