KEY RISKS AND RISK MANAGEMENT

Interest Rate Risk: The fund invests in a medium-term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/events and/ or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

⁴BENCHMARK INFORMATION

Name: BPI Philippine Government Bond Index

Description and Key Characteristics: The BPI Index is intended to reflect the performance of Philippine Government, fixed-rate straight bonds denominated in Philippine Peso. It is intended to be a template for passive, diversified fixed income investment portfolios where securities are held in proportion to the market value (Market Capitalization) of the issued securities. It aims to provide accurate and objective benchmarks by which to assess the performance of the Philippine Government bond market.

The BPI Index comprises of the BPI Philippine Government Bond Index as the primary index and five other indices, each with constituents covering more specific asset segments.

Relation to the Fund's Objective or Investment Strategy: The Fund is actively managed, which allows the Trustee full discretion on security selection. The Trustee will use the BPI Philippine Government Bond Index as reference during portfolio construction to ensure that the active risk taken is commensurate to the Fund's objective and investor profile. Moreover, given the active nature of the Fund, the Trustee may select securities which are not within the benchmark index to take advantage of any opportunities available. Investors may use the Index to gauge the Fund's performance.

OUTLOOK AND STRATEGY

Market Review. Philippine government bond prices declined in May as yields rose sharply following a significant upside surprise in inflation. Headline inflation accelerated from 4.1% in March to 7.2% in April, well above market expectations of 5.5%. The increase was largely driven by higher fuel prices, elevated electricity rates, and faster rice inflation, indicating a broadening of price pressures.

Bond yields increased by an average of 61 basis points during the month. The 5-year benchmark yield rose from 6.87% to a high of 7.48% before closing at 7.34%. Investor sentiment remained cautious, with foreign investors posting net outflows of Php12 billion, bringing year-to-date outflows to Php251 billion.

Towards the latter part of the month, sentiment slightly improved amid positive developments in US-Iran negotiations, which helped ease concerns over global oil prices. Oil prices declined to below \$100 per barrel, providing some relief to inflation expectations.

During the month, the Bureau of the Treasury raised Php89 billion through its regular bond auctions, below its Php140 billion target, as the government opted to accept fewer bids in light of rising yields.

Fund Performance. The Fund returned -1.89% for the month, below its benchmark by 14 basis points.

Fund Strategy. The Fund continues to maintain a nimble portfolio position to capture opportunities as interest rates are expected to remain elevated in the near term. Local inflation remained above the BSP's target range, with April data showing continued price pressures driven largely by higher food and energy costs and their indirect impact on other goods and services. This environment may support the BSP's cautious stance, with monetary policy expected to remain tight over the coming months. Market volatility may persist in the near term, influenced by global developments and evolving domestic inflation dynamics, and the Fund will be actively managed to navigate these conditions. Investors should note that bond funds may experience short-term price fluctuations, and returns are generally realized over a medium- to long-term investment horizon.
