KEY RISKS AND RISK MANAGEMENT

Interest Rate Risk: The fund invests in a long-term portfolio of US Dollar denominated Philippine sovereign and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic and global political and economic conditions.

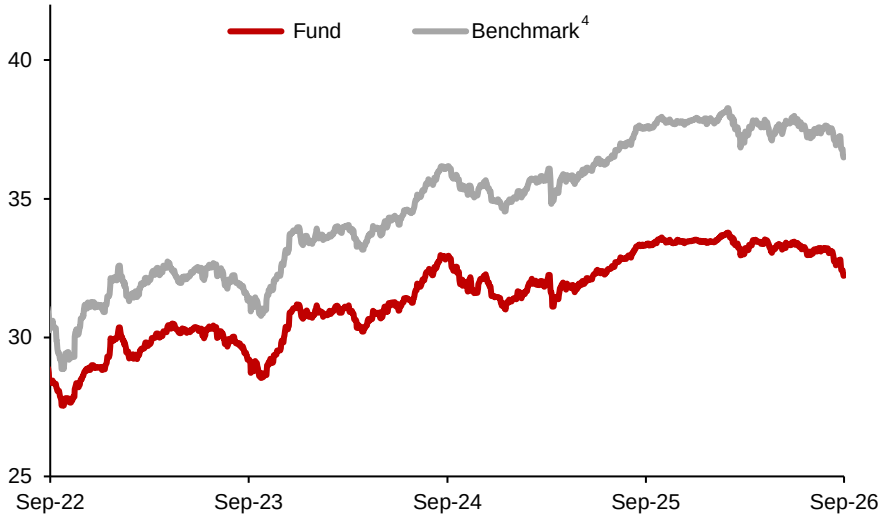

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

[4]BENCHMARK INFORMATION

Name: JPMorgan Asia Credit Index – Philippines Total Return

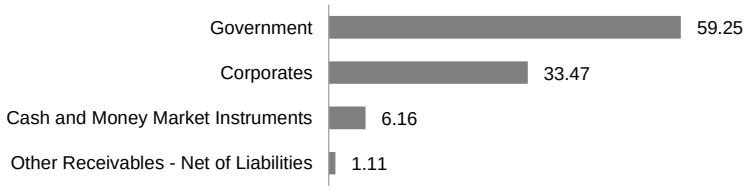

Description and Key Characteristics: The J.P. Morgan Asia Credit Index (JACI) launched on December 31, 1999, providing investors with a product that would aid in the evaluation and observation of investment opportunities in fixed rate US dollar-denominated bonds issued by Asia sovereigns, quasi-sovereigns, banks, and corporates. The main purpose of the index is to track the total return performance of a liquid and divers universe of debt securities considered to be a fair representation of the asset class. The existing JACI contains majority of all fixed- rate bonds issued by Asia-domiciled entities having a nominal outstanding of at least $300 million and more than one year to maturity. The JPMorgan Asia Credit Index – Philippines Total Return is a sub-index of JACI.

Relation to the Fund's Objective or Investment Strategy: The Fund is actively managed, which allows the Trustee full discretion on security selection. The Trustee will use the JPMorgan Asia Credit Index –Philippines Total Return as reference during portfolio construction to ensure that the active risk taken is commensurate to the Fund's objective and investor profile. Moreover, given the active nature of the Fund, the Trustee may select securities which are not within the benchmark index to take advantage of any opportunities available. Investors may use the Index to gauge the Fund's performance.

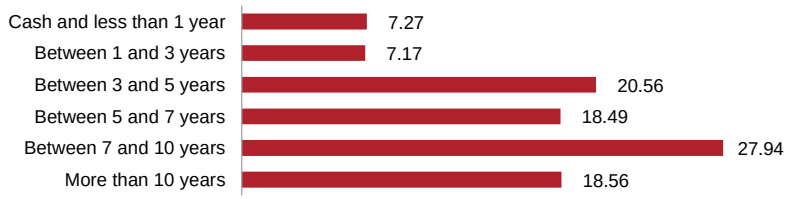

Information about the benchmark may be accessed through the J.P. Morgan website https://www.jpmorgan.com/.Alternatively, participants may request information from BPI Wealth at bpiwealth@bpi.com.ph.

OUTLOOK AND STRATEGY

Market Review. Global markets in September 2026 were volatile as a sharp government bond selloff, central bank tightening and ongoing tensions in the Middle East weighed on sentiment. At its September 15–16 policy meeting, the Federal Reserve raised its benchmark interest rate by 25 basis points to a target range of 3.75%–4.00%. This was the Fed's first rate increase in three years under Chair Kevin Warsh, prompted by sticky inflation and stable employment data. Meanwhile, the U.S.–Iran conflict remained unresolved, keeping traffic through the Strait of Hormuz restricted and pushing oil higher, with Brent futures trading between the low-$90s and above $100 per barrel during the month. In response to the rate hike and hawkish signals from the Fed, Treasury yields rose sharply across the curve, with the 2-year yield climbing about 54 basis points to 4.88% and the 10-year yield ending at 5.29%, its highest level in more than two decades.

Corporate credit and regional Asian USD bonds came under pressure from the rates selloff and heavy corporate supply, with credit spreads widening from historically tight levels. Philippine sovereign USD bonds and Asian USD credit continued to draw regional investor interest, though rising Treasury yields and heavy supply capped overall price gains. For the month of September, the Bloomberg Global Aggregate Bond Index returned –2.38%, while the JP Morgan Asia Credit Index (JACI) returned -3.00%]. Locally, high inflation and a weak peso near record low levels against the dollar kept pressure on domestic assets, while the Bangko Sentral ng Pilipinas (BSP) maintained a tight policy stance. The JPM Total Return Philippines Index returned -4.12% for the month.

Fund Performance. The Fund returned -2.95% for the month, outperforming its benchmark by 1 basis point.

Fund Strategy. The Fund continues to maintain a nimble portfolio position to take advantage of opportunities as global inflation remains sensitive to supply-side risks, particularly geopolitical tensions in the Middle East and energy market pressures, with potential spillover into broader prices. Volatility may persist in the near term, driven by global factors, and the portfolio will be actively managed to navigate these conditions. Investors in the bond fund must be prepared to withstand short-term price fluctuations, as higher investment value is generally achieved over a medium- to long-term investment horizon.
