ARTICLE II NATURE AND INVESTMENT OBJECTIVES

Sec. 1 Title of the Fund – The UITF shall be known as BPI Global Equity Fund-of-Funds (herein referred to as the “Fund”).

Sec. 2 Nature of the Fund – The Fund is a foreign currency denominated equity UITF operating as a multi-class Fund-of-Funds established in accordance with, and shall be operated subject to the provisions of this Declaration of Trust/ Plan Rules as the same may be amended from time to time, in accordance with the regulations issued by the Bangko Sentral ng Pilipinas (“BSP”) and existing laws. The Appendix provides a detailed description of the fund specifications.

Pursuant to existing BSP rules and regulations, as a Fund-of-Funds, this Fund is mandated to invest at least 90% of its assets in more than one collective investment scheme. Such underlying collective investment schemes are referred to as Target Funds and selected consistent with the provisions on investment objective and investment policy under Article II, Section 6 hereof and Sections 1 and 2 of the Appendix, following the Trustee’s established investment process.

As a multi-class fund, this Fund has more than one class of units in the Fund and is invested in the same Target Fund/s and pool of securities, investment objectives and policies. Each unit class may settle in different currencies, have different minimum initial participation and/or minimum additional participation amounts, trust fees and expenses as indicated in the Appendix, Sections 5, 8, and 9. Each unit class shall also have a separate Net Asset Value per Unit (“NAVPU”) as described in the Appendix, Section 6.

The Fund shall have a base currency of US Dollar (USD).

The Fund shall be treated as an entity separate and distinct from its constituent assets, contributions of the Participants thereto, and other trust accounts administered by the Trustee.

Sec. 3 Title to Assets of the Fund – All assets of the Fund shall, at all times, be considered as assets held by the Trustee, and title thereto shall be vested solely in the Trustee.

Sec. 4 Relationship of Trustee with the Fund – The Trustee shall not have any other relationship with the Fund except in its capacity as Trustee thereof. Provided, however, that the Trustee which simultaneously administers other trust, fiduciary, or investment management funds may invest such funds in the Fund, if allowed under a policy approved by its Board of Directors.

Sec. 5 Nature of Participant’s Interest in the Fund – No Participant shall have or be deemed to have any ownership or interest in any particular account, investment or asset of the Fund but shall have only its proportionate and undivided beneficial interest in the Fund as a whole.

Such disclosure shall be substantially in the form prescribed by the BSP.

**ARTICLE III

Sec. 1 Qualified Participants (Requirements and Restrictions) – Prior to acceptance of the initial participation in the Fund, the Trustee shall perform a Client Suitability Assessment (CSA) for the purpose of profiling the risk return orientation of the client and establishing the suitability of the client to the Fund. Risk Profile	Aggressive	Aggressive

Qualified participants are more specifically defined in the Appendix, Section 5.

In the case of a multi-class fund, units shall be issued as units in a class of a Fund. The beneficial interest in the Fund shall be divided into units, each of which shall represent a pro rata interest, determined under the net asset value per unit (“NAVPU”) valuation methodology, in the aggregate market value of all instruments in the Fund.

The participation or redemption of units of participation in the Fund may be made only on the basis of the valuation methodology under Article V hereof, and in such frequency as indicated in the Appendix, Section 6.

MANNER OF OPERATION**

Conversely, every redemption of participation/s from a unit class of the Fund shall serve to contract the Fund's total outstanding units of that particular class and of the Fund.

Every participation in any of the unit classes of the Fund shall be evidenced by a purchase of units arrived at by dividing the amount of investment by the prevailing NAVPU of that particular class. On the other hand, every redemption of participation from any of the unit classes of the Fund shall be evidenced by a sale of units arrived at by dividing the amount of redemption by the prevailing NAVPU of that particular unit class.

Sec. 4 Allocation and Distribution of Income – The market value of the Fund's investments, net of taxes, fees and expenses which are chargeable against the Fund shall be reflected in every net asset value ("NAV") computation. The unrealized income / loss of each Participant in the unit class of a Fund shall be the difference between the prevailing NAVPU of a unit class over the acquisition cost of the Participant's units of the same unit class, multiplied by the number of units of that particular unit class held by the Participant. The actual distribution or realization of income shall take place every time a redemption of units from the Fund is made, to the extent of the number of units redeemed.

RISK DISCLOSURE STATEMENT

Prior to making an investment, BPI Wealth – A Trust Corporation (BPI Wealth) hereby informs you of the nature of investments and the inherent risks involved in investing. As investments generally carry different degrees of risks, it is necessary that before making any investment, you should have:

- Fully understood the nature of the investment and the extent of your exposure to risks;
- Read this Risk Disclosure Statement completely; and
- Independently determined that the investment is appropriate for you.

We wish to highlight that investment funds, such as Unit Investment Trust Funds (UITFs) and Mutual Funds (MFs), are likewise subject to risks. Their value may decline or appreciate depending on the fund's Net Asset Value per Unit/Share (NAVPU/NAVPS) which may fluctuate daily. The NAVPU/NAVPS is computed by dividing the Net Asset Value (NAV) of the investment fund by the number of its outstanding shares/units. The NAV is derived from the summation of the market value of the underlying securities of the investment fund plus accrued interest income less liabilities and qualified expenses. It is understood that investment funds, trust, investment management, and other fiduciary accounts are not deposit products and are not covered by the Philippine Deposit Insurance Corporation (PDIC).

INVESTMENT IN SECURITIES DOES NOT PROVIDE GUARANTEED RETURNS. THEIR VALUE MAY DECLINE OR APPRECIATE DEPENDING ON PREVAILING MARKET CIRCUMSTANCES. EVEN INVESTMENT FUNDS THAT ARE INVESTED IN GOVERNMENT SECURITIES AND HIGH-GRADE PRIME INVESTMENT OUTLETS, THE PRINCIPAL AND EARNINGS FROM SUCH INVESTMENTS CAN BE LOST IN WHOLE OR IN PART WHEN THE NAVPU/NAVPS AT THE TIME OF REDEMPTION IS LOWER THAN THE NAVPU/NAVPS AT THE TIME OF PARTICIPATION. GAINS FROM THE INVESTMENT IS REALIZED WHEN THE NAVPU/NAVPS AT THE TIME OF REDEMPTION IS HIGHER THAN THE NAVPU/NAVPS AT THE TIME OF PARTICIPATION.

Enumerated and defined below are the various risks to which you are normally exposed when investing, depending on the type of underlying securities lodged in your investment portfolio (hereinafter, "Portfolio"). Unit Investment Trust Funds and Mutual Funds (hereinafter, "Fund" or "Funds") are likewise subject to these risks.

Interest Rate Risk

This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.

Interest rate changes may affect the prices of fixed income securities inversely, i.e., as interest rates rise, bond prices fall and when interest rates decline, bond prices rise. In this regard, the NAVPU/NAVPS of investment funds invested in fixed income instruments may also adjust and decline when there is a rise in interest rates.

Market/Price Risk

This is the possibility for an investor to experience losses due to changes in market prices of securities (e.g., bonds and equities). It is the exposure to the uncertain market value of a Portfolio/Fund due to price fluctuations.

It is the risk of the Portfolio/Fund to lose value due to a decline in securities prices, which may sometimes happen rapidly or unpredictably. The value of investments fluctuates over a given time period because of general market conditions, economic changes or other events that impact large portions of the market such as political events, natural calamities, etc. As a result, the value of a Portfolio/Fund may increase to make profit or decrease to incur loss.

Liquidity Risk

This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by

different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.

Liquidity risk occurs when certain securities in a Portfolio/Fund may be difficult or impossible to sell at a particular time which may prevent the redemption or withdrawal of the investment. Even government securities which are the most liquid of fixed income securities may be subjected to liquidity risk particularly if a sizeable volume is involved.

Credit Risk/Default Risk

This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued. This inability of the borrower to make good on its financial obligations may have resulted from adverse changes in its financial condition thus, lowering credit quality of the security, and consequently lowering the price (market/price risk) which contributes to the difficulty in selling such security. It also includes risk on a counterparty (a party with which BPI Wealth trades/transacts) defaulting on a contract to deliver its obligation either in cash or securities.

This is the risk of losing value in a Portfolio/Fund in the event the borrower defaults on his obligation or in the case of counterparty, when it fails to deliver on the agreed trade. This decline in the value of a Portfolio/Fund happens because the default/failure would make the price of the security go down and may make the security difficult to sell.

Reinvestment Risk

This is the risk associated with the possibility of having lower returns when maturing funds or interest earnings of a Portfolio/Fund are reinvested.

Investors who withdraw/redeem and realize their gains run the risk of reinvesting their funds in an alternative investment outlet with lower yields. Similarly, there is the risk of not being able to find good or better alternative investment outlets as some of the securities in a Portfolio/Fund matures.

In case of a foreign-currency denominated Portfolio/Fund or a peso-denominated investment Portfolio/Fund that is allowed to invest in securities denominated in currencies other than its base currency, the Portfolio/Fund is also exposed to the following risks.

Foreign Exchange Risk

This is the possibility for an investor to experience losses due to fluctuations in foreign exchange rates. The exchange rates depend upon a variety of global and local factors, e.g., interest rates, economic performance, and political developments.

It is the risk of a Portfolio/Fund to currency fluctuations when the value of investments in securities denominated in currencies other than the base currency of a Portfolio/Fund depreciates. Conversely, it is the risk of a Portfolio/Fund to lose value when its base currency appreciates. Specifically for Funds invested in foreign-currency denominated securities, their NAVPU/NAVPS may decrease to incur loss when the Philippine Peso appreciates.

Country Risk

This is the possibility for an investor to experience losses arising from investments in securities issued by/in foreign countries due to the political, economic and social structures of such countries. There are risks in foreign investments due to the possible internal and external conflicts, currency devaluations, foreign ownership limitations and tax increases of the foreign country involved which are difficult to predict but must be taken into account in making such investments.

Likewise, brokerage commissions and other fees may be higher in foreign securities. Government supervision and regulation of foreign stock exchanges, currency markets, trading systems and brokers may be less than those in the Philippines. The procedures and rules governing foreign transactions and custody of securities may also involve delays in payment, delivery or recovery of investments.

Index-Tracking Risk

Specifically for index-tracker investment funds, this is the risk that the fund does not match or achieve a high degree of correlation with the return of an index because of operating and other fund-management related expenses.

Other Risks

A Portfolio/Fund may be further exposed to the risk of any actual or potential conflicts of interest in the handling of in-house or related party transactions by BPI Wealth. These transactions may include parent/affiliate-bank deposits; purchase of own- institution or affiliate obligations (stocks, mortgages); purchase of assets from or sales to own institution, directors, officers, subsidiaries, affiliates or other related interests/parties; or purchases or sales between fiduciary/managed accounts.

For complex investment products, said instruments can be subject to sudden and sharp falls in market value such that you may lose your entire investment and extra funding may be required, as necessary.
