PIMCO

PIMCO Balanced Income and Growth Fund

INSTITUTIONAL CLASS INCOME II SHARES

Fund Description

The investment objective of the Fund is to seek to maximise total return, consistent with preservation of capital and prudent investment management.

The Fund will utilize a global multi-sector strategy that seeks to combine the Investment Advisor's total return investment process and philosophy with income maximization. Portfolio construction is founded on the principle of diversification across a broad range of equity and global fixed income securities.

- Innovative approach to the multi-asset income space, providing the potential for both income and growth.
- Access to PIMCO's expertise in multi-asset investing across global fixed income, global equities, and additional macro-driven tactical strategies in a stable, yet flexible 60/40 construct.

The Fund may use or invest in financial derivatives.

The Fund leverages PIMCO's industry-leading macroeconomic views, time-tested investment process, and robust quantitative capabilities. PBIG is thoughtfully-designed as a diversified and stable multi-asset strategy composed of global core equities, flexible income-oriented fixed income, and tactical flexibility intended to provide a ballast in clients' portfolios across all market environments.

ABOUT THE BENCHMARK

The MSCI ACWI Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The Index consists of a group of country indices comprising developed and emerging market country indices. It is not possible to invest directly in an unmanaged index. Bloomberg U.S. Aggregate Bond Index represents securities that are SEC-registered, taxable, and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis. It is not possible to invest directly in an unmanaged index.
Unless otherwise stated in the prospectus, the Fund is not managed against a particular benchmark or index, and any reference to a particular benchmark or index in this factsheet is made solely for risk or performance comparison purposes.

PIMCO

Hypothetical Growth of 10K

Source: PIMCO. **Past Performance is not a guarantee or reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future.**
Growth of 10,000 is calculated at NAV and assumes that all dividend and capital gain distributions were reinvested. It does not take into account sales charges or the effect of taxes. Share value may go up as well as down as a result of currency fluctuations.

Performance (Net of Fees)	1 Mo.	3 Mos.	6 Mos.	1 Yr.	SI
Institutional, Inc II (%) [1]	-2.02	0.59	9.99	16.51	15.60
Net of 5% Preliminary Charge[2]	-6.94	-4.46	4.53	10.70	12.65
Benchmark (%)	-1.71	-0.46	8.64	9.15	—

Past Performance is not a guarantee or reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future.

Calendar Year (Net of Fees)	2025	YTD
Institutional, Inc II (%)[1]	21.71	11.20
Net of 5% Preliminary Charge[2]	15.62	5.63
Benchmark (%)	16.22	6.57

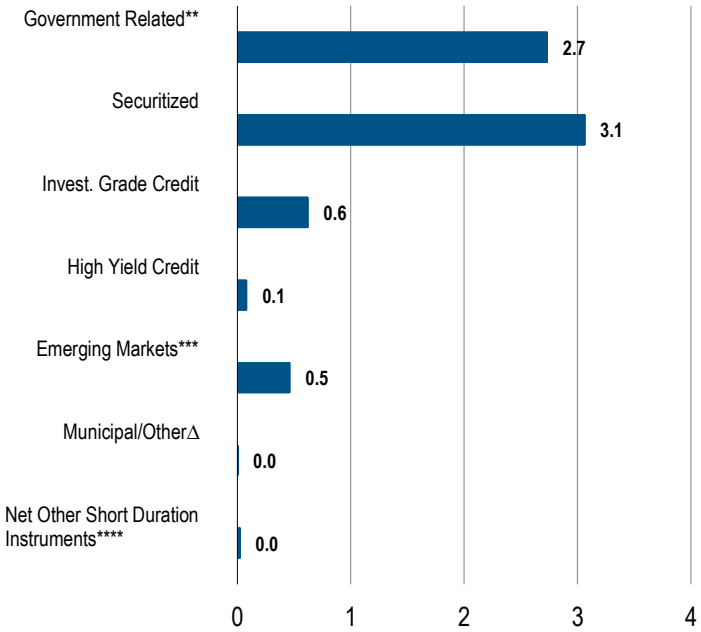

The investment objective and policy of the Fund was changed on 29 November 2023, the performance prior to this were achieved under circumstances that no longer apply. *Past performance is not necessarily indicative of future performance.* The benchmark is the 60% MSCI ACWI Index / 40% Bloomberg US Aggregate Bond Index All periods longer than one year are annualised. SI is the performance since inception. [1] Performance shown is on a NAV-to-NAV basis in the denominated currency, excluding the preliminary charge and on the assumption that distributions are reinvested, as applicable. [2] Performance shown is on a NAV-to-NAV basis in the denominated currency, taking into account the preliminary charge and on the assumption that distributions are reinvested, as applicable. A preliminary charge of up to 5% may or may not be deducted from the subscription amount depending on the distributor from whom you had purchased shares, as such this may not represent actual performance returns. Investment returns denominated in non-local currency may be exposed to exchange rate fluctuations.

Sector Allocation (Duration in Years)

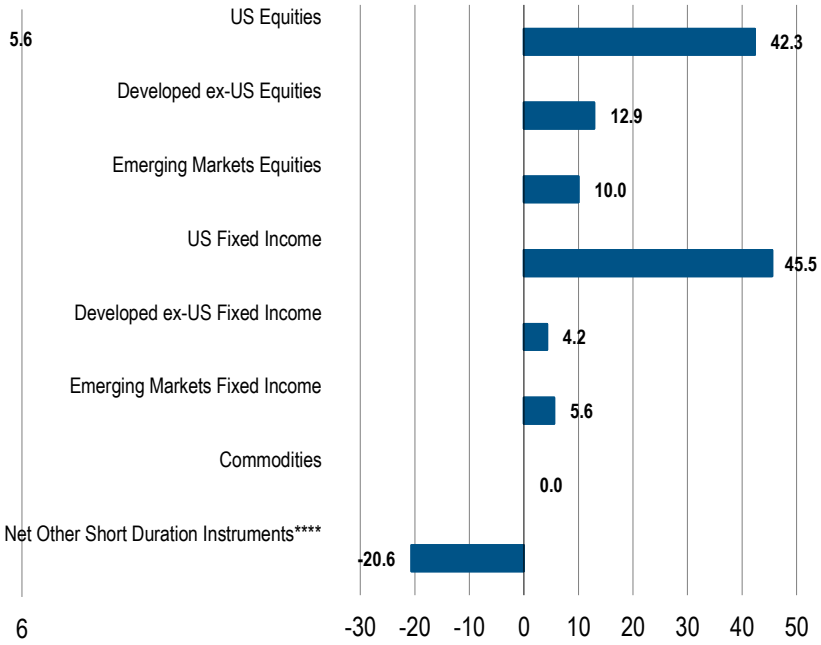

PIMCO

Top 10 Country Exposure by Currency of Settlement – Fixed Income (Duration in Years)

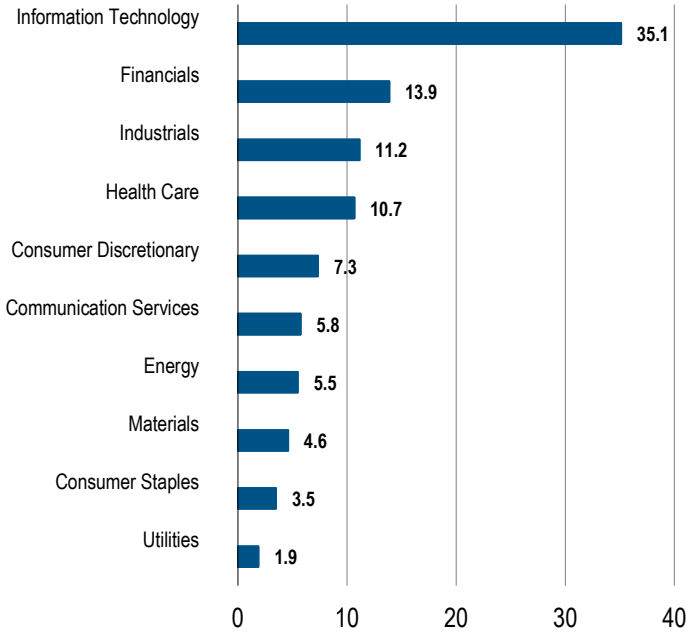

Asset Allocation (% Market Value)

Countries are categorized by currency of settlement. EMU-member countries reflect the country of exposure for EUR-denominated securities. Europe represents European Union instruments that cannot be separated by specific country.

Sector diversification (% Market Value)

⊕Yields reported gross of fees, the deduction of which will reduce the yield. Yields are reported in the base currency of the fund and are not specific to the share class. PIMCO calculates a Fund's Estimated Yield to Maturity by averaging the yield to maturity of each security held in the Fund on a market weighted basis. PIMCO sources each security's yield to maturity from PIMCO's Portfolio Analytics database. When not available in PIMCO's Portfolio Analytics database, PIMCO sources the security's yield to maturity from Bloomberg. When not available in either database, PIMCO will assign a yield to maturity for that security from a PIMCO matrix based on prior data. The source data used in such circumstances is a static metric and PIMCO makes no representation as to the accuracy of the data for the purposes of calculating the Estimated Yield to Maturity. The Estimated Yield to Maturity is provided for illustrative purposes only and should not be relied upon as a primary basis for an investment decision and should not be interpreted as a guarantee or prediction of future performance of the Fund or the likely returns of any investment.
†Annualised Distribution Yield is as of last month ending 09/30/2026. The dividend distribution rate/yield is based on historical dividend rate/yield. The dividend amount or dividend rate/yield is not guaranteed. Distribution payments of the Fund where applicable, may at the sole discretion of the Fund, be made out of either income and/ or capital of the Fund.
****Net Other Short Duration Instruments includes securities and other instruments (except instruments tied to emerging markets by country of risk) with an effective duration less than one year and rated investment grade or higher or, if unrated, determined by PIMCO to be of comparable quality, commingled liquidity funds, uninvested cash, interest receivables, net unsettled trades, broker money, short duration derivatives and derivatives offsets. With respect to certain categories of short duration securities, the Adviser reserves the discretion to require a minimum credit rating higher than investment grade for inclusion in this category. Derivatives Offsets includes offsets associated with investments in futures, swaps and other derivatives. Such offsets may be taken at the notional value of the derivative position.
**May include nominal and inflation-protected Treasuries, Treasury futures and options, agencies, FDIC-guaranteed and government-guaranteed corporate securities, and interest rate swaps.
***Short duration emerging markets instruments includes an emerging market security or other instrument economically tied to an emerging market country by country of risk with an effective duration less than one year and rated investment grade or higher or if unrated, determined to be similar quality by PIMCO. Emerging Markets includes the value of short duration emerging markets instruments previously reported in another category.
△Where permitted by the investment guidelines stated in the portfolios offering documents, “other” may include exposure to, convertibles, preferred, common stock, equity-related securities, and Yankee bonds.
****Net Other Short Duration Instruments includes securities and other instruments (except instruments tied to emerging markets by country of risk) with an effective duration less than one year and rated investment grade or higher or, if unrated, determined by PIMCO to be of comparable quality, commingled liquidity funds, uninvested cash, interest receivables, net unsettled trades, broker money, short duration derivatives and derivatives offsets. With respect to certain categories of short duration securities, the Adviser reserves the discretion to require a minimum credit rating higher than investment grade for inclusion in this category. Derivatives Offsets includes offsets associated with investments in futures, swaps and other derivatives. Such offsets may be taken at the notional value of the derivative position.
Source: PIMCO, index provider for benchmark data.
PIMCO duration calculation that adjusts the durations of credit securities to account for the potential that in the event of default investors will receive the recovery amount prior to the maturity of the security.
Differences in the Fund’s performance versus the index and related attribution information with respect to particular categories of securities or individual positions may be attributable, in part, to differences in the pricing methodologies used by the Fund and the index.
Prior to 29 November 2023, the Balanced Income and Growth Fund was named the Global Core Asset Allocation Fund. The investment strategy of the Fund were changed on 29 November 2023.
Dividend is not guaranteed. Past distributions are not necessarily indicative of future trends, which may be lower. A positive distribution yield does not imply a positive return. Data does not include special cash dividends. Distribution payments of the Fund where applicable, may at the sole discretion of the Fund, be made out of either income and/ or capital of the Fund. In the case of the Fund, the Fund may at its discretion pay dividends out of capital which may result in an immediate reduction of the Fund’s NAV per share. In the case of Income II Shares, the Fund may at its discretion pay dividends out of capital as well as take into account the yield differential arising from share class currency hedging (which constitutes a distribution from capital). The management and other fees payable by the Income II Shares may also be charged to the capital of the Income II Shares, resulting in an increase in distributable income available for the payment of dividends and therefore, the Income II Shares may effectively pay dividends out of capital. This may result in an immediate reduction of the NAV per share for the Income II Shares. Please refer to www.pimco.com/sg/en for more information on income statistics.

Average Credit Quality (ACQ) - Average Credit Quality (ACQ) is calculated by PIMCO using an internal proprietary calculation methodology and ranges from AAA (highest) to D (lowest); the portfolio contained herein is not reflective of individual ratings by an independent rating agency. ACQ is a market-weighted average of the credit ratings of the credit instruments and holdings which create bilateral counterparty risk, excluding equities and certain other instruments. In calculating the ACQ of a portfolio, PIMCO generally uses the highest of the ratings of S&P, Moody's or Fitch assigned to each issuer held by the portfolio. If an issue or issuer is unrated, it is generally assigned a rating by PIMCO. A significant portion of a portfolio's ACQ may be derived from ratings assigned by PIMCO. ACQ is calculated on a daily basis for each portfolio and will change over time as the ratings for individual securities held in the portfolio change or as instruments are added and removed from the portfolio. In general, instruments are weighted at their market value. Certain derivatives, such as credit default swaps, are weighted at "bond equivalent value," which is the notional amount of the instrument adjusted by the current gain or loss on the position. Certain unrated instruments are not assigned a rating by PIMCO (such as OTC Credit Spreads, Money Market futures, Equity futures, and common stock) and are excluded from the ACQ calculation. This could lead to an under- estimation and under-statement of the credit risk of a portfolio. The portfolio itself has not been individually rated by an independent rating agency. The credit quality of a particular security or group of securities does not ensure the quality, stability or safety of the entire portfolio. PIMCO-assigned ratings used in the calculation may not be representative of PIMCO's current views should the security review have occurred on a date other than the date that this calculation was generated, which will generally be the case, or should an event that could affect a credit rating have occurred.The Fund may use or invest in financial derivative instruments and be subject to various risks (including for e.g. liquidity risk, interest rate risk, market risk, credit risk and management risk etc.) associated with such investments in financial derivative instruments. A Fund's use of, or investment in, financial derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. Participation in the markets for financial derivative instruments involves investment risks and transaction costs to which a Fund may not be subject if such strategies are not used. You should carefully consider these risks prior to making an investment in the relevant Fund. Please refer to the Singapore prospectus for more information.

Investment involves risk including possible loss of the principal amount invested. Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future. The value of shares of the Fund and the income accruing to them, if any, may fall or rise. Investment returns denominated in non-local currency may be exposed to exchange rate fluctuations. In an environment where interest rates may trend upward, rising rates will negatively impact most bond funds, and fixed income securities held by a fund are likely to decrease in value. Bond funds and individual bonds with a longer duration (a measure of the expected life of a security) tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations. Investors should consider the investment objectives, risks, charges and expenses carefully before investing. This and other information is contained in the Fund's Singapore Prospectus which is available and can be obtained from our website www.pimco.com/sg/en, a Fund distributor or the Singapore Representative. Prospective investors should read the Fund's Singapore Prospectus before deciding whether to subscribe for or purchase shares in any of the Funds. Investors may wish to seek advice from a financial adviser before making a commitment to invest and in the event you choose not to seek advice, you should consider whether the investment is suitable for you.

PIMCO Funds: Global Investors Series plc is an open-ended investment company with variable capital and with segregated liability between Funds incorporated on 10 December, 1997 and is authorised in Ireland by the Central Bank as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (S.I. No. 352 of 2011) as amended. PIMCO Funds: Global Investors Series plc has appointed PIMCO Asia Pte Ltd as the Singapore Representative. This document is issued by PIMCO Asia Pte Ltd (8 Marina View, #30-01, Asia Square Tower 1, Singapore 018960, Registration No. 199804652K).
