**ARTICLE IV
MANNER OF OPERATION**

Conversely, every redemption of participation/s from a unit class of the Fund shall serve to contract the total outstanding units of that particular unit class and of the Fund.

Every participation in any of the unit classes of the Fund shall be evidenced by a purchase of units arrived at by dividing the amount of investment by the prevailing net asset value per unit (NAVPU) of that particular class. On the other hand, redemption of participations from any of the unit classes of the Fund shall be evidenced by a sale of units arrived at by dividing the amount of redemption by the prevailing NAVPU of that particular unit class.

Sec. 4 Allocation and Distribution of Income – The market value of the Fund’s investments, net of taxes, fees and expenses which are chargeable against the Fund shall be reflected in every NAV computation. The income of the Fund, therefore, shall be allocated to the Participants on a pro rata and pari passu basis depending upon the number of units held by each Participant in the Fund. The unrealized income / loss of each Participant in the unit class of a Fund shall be the difference between the prevailing NAVPU of a unit class over the acquisition cost of the Participant’s units of the same unit class, multiplied by the number of units of that particular unit class held by the Participant. The actual distribution or realization of income shall take place every time a redemption of units from the Fund is made, to the extent of the number of units redeemed.
